## **FUND MANAGER'S COMMENTS**

The Fund's performance for the month of April 2016 fell 1.83%. Nevertheless, the fund outperformed the benchmark by 0.62%.

In April 2016, the FTSE Bursa Malaysia Kuala Lumpur Composite Index fell 2.61% month-on-month (m-o-m) to 1,672.72 points, giving up most of its gains in March despite the higher oil prices. On a year-to-date basis, the index has fallen 1.17%. Investors were rattled by news of 1MDB's bond default, which triggered a cross default on two other notes. Bank Negara Malaysia's new internally sourced governor failed to lift the market. Net foreign equity inflows slowed to RM427 million in April, bringing year-to-date net foreign equity inflows to RM6 billion. 10Y MGS closed the month at 3.87%, while the Malaysian Ringgit (MYR) was weaker at 3.90, down 0.78% m-o-m.

Going into May, we stay cautious as net foreign equity inflows have slowed in April. Earnings growth will continue to be the key for the sustainability of the rally. We will continue to add high dividend stocks such as Real Estate Investment Trusts, conglomerates and consumer names into our portfolios as we believe that in an environment of negative yield globally, Malaysia offers decent upside from a dividend yield perspective. We also continue to maintain our overweight in the construction sector as positive newsflow from more fiscal expansion from the government will continue this year.
