FUND MANAGER'S COMMENTS

In December 2018, the Fund's performance dropped by 0.62%, underperforming the benchmark by 0.60%.

The FTSE Bursa Malaysia Kuala Lumpur Composite Index (FBMKLCI) ended December marginally higher by 0.64% to close at 1,690.58 pts. For 2018, the FBMKLCI is lower by 5.91%. During the month, the Ringgit strengthened to MYR4.133/USD from MYR4.184 in the previous month. Brent crude oil slumped to USD53.80 per barrel, down by 8.36% M-o-M. We expect Malaysia's GDP growth to moderate in 2019 on softening external demand and government's austerity measure. The Street expects the budget deficit to narrow from 3.7% in 2018 to 3.4% in 2019 as the government draws on Petronas' financial resources with a RM30bn special dividend. However, recent oil price weakness has dampened the government's finances as Budget 2019 was prepared based on average Brent crude oil price assumption of USD70/bbl vs less than USD60/bbl now. Should the current oil price weakness persist, the federal government will need to re-calibrate its budget to avoid further widening its budget deficit. If this materialises, GDP growth will face downside risk as the government's further cost rationalisation will be a dampener on the economy.

December saw foreign institutional investors net selling RM1.0bil versus RM0.7bil in the previous month. Total outflow for 2018 amounted to RM11.6bil vs. net inflow of RM10.8b in 2017.

FUND MANAGER'S COMMENTS (CONTINUED)

During the month, Malaysia Government Securities (“MGS”) yield curve flattened with yields dropping the most in the 20-year segment. The 3-, 5-, 10-, 15-, 20- and 30-year MGS yields traded lower at 3.62% (-7bps), 3.84% (-8bps), 4.10% (-6bps), 4.47% (-9 bps), 4.66% (-12bps) and 4.87% (-5bps) respectively at end of December. Year-to-date yield curve flattened following the Overnight Policy Rate (“OPR”) hike in January 2018 and also foreign selling which were the major holders of short-dated bonds.

On the local economy front, Malaysia’s exports rose a strong 17.7% YoY in October-18 (Sep-18: +6.5%) and above consensus estimate of 5.8%. Meanwhile, imports rebounded to grow 11.4% YoY after it declined 2.8% prior month. Consequently, trade surplus widened to RM16.3bn. However, supply chain spillovers cause by trade war and lower commodity prices will pose downside risks to export growth. Malaysia’s November-18 CPI rose 0.2% YoY missed expectation of 0.4% increase and lower than 0.6% recorded in October-18. The lower increase in November-18 inflation was mainly driven by gains in food and beverages (+1.1%) and housing costs (+2.0%) but offset by contraction in transport and communication which fell 2.3% and 1.3% respectively. Malaysia’s growth has been decelerating since 4Q17, reflecting supply side disruptions and weaker public spending exacerbated by policy shifts since the change in government. BNM forecast growth of 4.9% in 2019 was projected taking into consideration the initial US-China tariffs announced. However, BNM has also estimated that a full scale trade war could result in real GDP growth falling below 4.0%. A slower growth will risk Government missing the fiscal deficit target of 3.4% of GDP for 2019, if it decided on expansionary mode to support growth.
