## FUND MANAGER'S COMMENTS

The Fund gained 1.79% during the month of September 2017, outperformed the benchmark which gained 1.24%. Stock selection in the underlying US contributed the most to outperformance. YTD, the Fund gained 8.21% while the benchmark gained 9.43%.

Global equities recorded gains to end the third quarter of 2017 on a happy note. Leadership for the month was taken by Europe (a weaker Euro helped) and US small caps (hopes of tax reform buoyed the sector, which had otherwise struggled this year), while EMs/Asia (especially offshore China) and Europe took leadership spots for the quarter. US and Japan too ended with gains but not nearly as much. Political risks seem to have reduced: the US Congress got to work on the much-awaited tax plan after agreeing to suspend the debt ceiling till December 2017 while noise on North Korea subsided to an extent. However, European political risk ticked up with the secession vote in Catalonia.

The Fund is underweight in the US market and overweight in Europe and Japan.
