## FUND MANAGER'S COMMENTS

While the financial markets struggle with tightening measures and reduced liquidity, global market uncertainties caused by trade war tensions and geopolitical risk exacerbate the market risk going forward. We see increasing signs that the global economy may slow down and therefore a higher likelihood that some of the tightening measures may not have much room to move further. China, for example, is already giving a different signal as it has cut rates several times. The contrasting signals and escalating trade tensions have increased volatility and downside risk to the global economy. As such, we are targeting duration of 5.5 - 6.0 years while remaining invested in liquid papers.
