## FUND MANAGER'S COMMENTS

The Fund fell 0.14 in May 2014, underperforming the benchmark by 0.28%. On a YTD basis, the Fund has underperformed the benchmark by 0.36%.

Our view of a stronger global economy in the second half of 2014 still holds. The main driver of this upswing is the US economy. Growth in Europe has also been gaining traction and in Japan, the stimulus is slowly leading to a sustained growth in domestic demand. Against this backdrop, we are looking for a cyclical upswing in Asian (including Malaysia) growth in the second half of 2014. Malaysia now trades at 16.2x and 14.7x 2014 and 2015 earnings respectively. Earnings continue to be downgraded with EPS growth at only 4.2% for 2014. As such, the market looks expensive based on 2014 earnings. Nevertheless, EPS growth for 2015 is projected at 10.1% and valuation is fair. Hence, there could be upside to the market once we move into the second half of 2014.

For equities, with the World Cup coming up this month, we expect the market to take a breather. We continue to overweight the Oil & Gas, Telecommunications and Utilities sectors. We also continue to trim those small cap stocks that have reached fair value. We are increasingly more optimistic of Plantation and Construction, driven by the increasing probability of El Nino and the positive newsflow from the RM25 billion MRT2 project as well as the award of the RM10-15 billion worth of IPP, water and toll highway projects. For fixed income, we prefer to invest in longer duration liquid securities as the yield curve is at its steepest as compared to the past 2 years. We aim to maintain duration and invest in higher coupon bonds to cushion any increase in yields. We will concentrate on primary issues with higher yields as the market continues to re-price. Primary issues that have been re-priced to current levels should see good pick up from investors. Furthermore, we will continue to maintain our trading stance on MGS/ Gil and accumulate (increase exposure in MGS/ Gil) as we believe that yields are expected to trade within a wider range going forwards.
