FUND MANAGER’S COMMENTS

- Asian equities generally moved up for the month, with gains led by the Greater China economies amidst news that MSCI, a widely followed index provider, would increase the weight of China equities in its indices.
- Stimulus provided by policymakers in China also continued to support sentiments despite PMI numbers contracting for the third consecutive month.
- Valuation for Asian stocks has normalized towards its long-term average following the recent rally, while earnings revision has been stabilizing.
- On a global front, markets were generally choppy in the month of February while trading in a tight range. US treasuries held a mini rally in the early part of the month as the FOMC minutes sounded dovish and took a softer tone, suggesting that the Fed will be driven by a more data-dependent path going forward.
- STRATEGY:** The portfolio will continue to be positioned with value companies, which would benefit from a potential turn in market sentiments.
- The fund continues to provide a broad-based diversification in sector exposure to investors. Nevertheless, the fund does have a slight tilt towards the yield-side.
- The fund is highly invested for now but is cognizant that valuations have become less attractive and sentiments have moved to neutral territory. The deteriorating macro environment remains the key challenge for markets, but policymakers are reacting. Consensus is increasingly expecting an economic recovery by 2H 2019.
