## FUND MANAGER'S COMMENTS

The fund rose 1.43% in September 2015 and outperformed the benchmark by 0.43%. Year-to-date ("YTD"), the Fund fell 2.32%, while the benchmark dropped 2.58%.

In September 2015, the FTSE Bursa Malaysia Kuala Lumpur Composite Index ("FBMKLCI") gained 8 points or 0.51% to close at 1,621 points. YTD, FBKLCI has lost 8.0%. When the Prime Minister announced plans to inject RM20 billion into the equities market via ValueCAP on September 14, the index staged a brief rally to 1,681 points before giving up most of the gains by month end. Overall, there is growing concern of a sharper than expected slowdown in global growth and deflationary pressures, as China releases weak macro data. The Ringgit hit a new low of 4.457 on September 29 before closing the month at 4.395. Net foreign outflows amounted to RM2.3 billion for the month, with YTD net foreign outflows ballooning to RM18.1 billion. Forex reserves hit a low of USD94.5 billion in mid August 2015 before rebounding to USD95.3 billion in mid September 2015.

As expected, the street continues to downgrade earnings. Based on our database, Earnings Per Share ("EPS") growth is now 1.9% and 6.6% for 2015 and 2016, with corresponding Price Earnings Ratio ("PER") of 17 times and 16 times. We think there is still room for more earnings downgrades. Thus, the FBKLCI continues to look fair for 2016.

We stay focused on stocks with good quality growth, strong cash flows and sustainable dividends. We continue to be positioned in Exporters (Technology, Gloves, Furniture), Ports and Utilities. We remain underweight in Oil & Gas, Plantations and Financials. The upcoming Budget 2016 is expected to be market neutral. While Construction may be in focus, the catalyst for the sector would be the actual award of the projects in 2016. We continue to seek alpha as we position ahead for 2016. For fixed income, we prefer to concentrate on selective re-priced corporate bonds from the primary and secondary market with higher yields for better yield enhancement.

### Disclaimer:

The benchmark performance is not a guide to future performances which may differ. The performance of the fund is not guaranteed. The value of the fund will fluctuate and may fall below the amount of premiums paid and the fund value depends on the actual performance on the underlying investment.

Any income distribution from the underlying assets of the investment-linked fund will be automatically reinvested into the respective investment-linked fund. The policy owner's total number of units will not change as a result of the reinvestment.
