## FUND MANAGER'S COMMENTS

- Despite multiple headwinds, global equities regained some of their recent losses in July. This was largely attributable to early corporate earnings results coming in better than initially feared and markets anticipating the Federal Reserve would moderate the pace of its tightening cycle after summer. The US was one of the top performing regions over the month.
- The Fund outperformed its benchmark over the month. ASML's shares rose over the month after the company reported results showing record orders and strong demand, which showed resilience amidst the challenging environment. Forward guidance was reduced due to the impact of delayed revenue recognition, supply chain disruption and inflationary headwinds. Indian paint manufacturer Asian Paints issued strong quarterly results, highlighting robust top-line growth driven by both volume and price. Manhattan Associates posted better-than-expected second quarter results, which highlighted strong sales momentum. The company is benefiting from a strong product cycle and the willingness of enterprises to invest in supply chain software.
- On the negative side, China Resources Land saw its shares weaken along with the wider sector amidst unrest and subsequent mortgage payment boycotts over unfinished residential properties. We remain comfortable with the company's exposure to shopping malls - a sizeable pipeline in major cities. AstraZeneca's shares were largely unchanged over the month following very strong relative performance year to date. Given the gains in the index, this provided a drag on relative returns. Elsewhere ACE Hardware reported results that missed consensus expectations as the challenging consumer environment impacted sales growth.
- We used share price weakness to build up positions in high conviction names such as Target, VAT Group and Atlas Copco.
- We exited our position in Tecan as active coverage was discontinued.

**RISKS**

All investment carries some form of risks. The potential key risks include but are not limited to the following:

<p><b>External Investment Manager Risk</b></p>	<p>The fund management function of the target fund is delegated to Aberdeen Asset Managers Limited (“AAML”). AAML (“External Investment Manager”) is an entity within the Aberdeen Standard Investments group (“ASI Group”). Although the External Investment Manager is an entity within the ASI Group and they will have regular meetings with Aberdeen Standard to deliberate on the investment themes and portfolio decisions, there is still the risk that the External Investment Manager may not adhere to the investment mandate of the target fund due to an oversight. In the event of an oversight by the External Investment Manager, the NAV of the target fund will be adversely affected and the investment of the policy owners may be jeopardised through the loss of their capital invested in the target fund.</p>
<p><b>Market risk</b></p>	<p>Market risk refers to potential losses that may arise from changes in the market prices of the Shariah-compliant equities that the target fund invests in. Prices of the Shariah-compliant equities will fluctuate in response to various factors, for example, events or news that relates to the Shariah-compliant equities as well as general market or economic conditions. In mitigating this risk, Aberdeen Standard will invest in various sectors, thus the collapse of any particular sector would not have a major adverse impact on the value of the target fund.</p>
<p><b>Stock specific risk</b></p>	<p>Any drop in the price of a particular Shariah-compliant stock held by the target fund may affect the unit price of the target fund adversely. This risk can be mitigated by investing in a wide range of Shariah-compliant equities in different sectors, thus spreading the element of risk.</p>
<p><b>Concentration risk</b></p>	<p>This risk refers to the risk that the target fund invests a substantial portion of its assets in a particular sector or geographical area which may cause the target fund to be more susceptible to adverse economic events affecting that particular industry or region. This risk is mitigated through the diversification process that Aberdeen Standard will employ in the management of the target fund whereby the target fund will hold a diversified portfolio of Shariah-compliant equities across various sectors and countries.</p>
<p><b>Shariah-compliant warrants risk</b></p>	<p>The price, performance and liquidity of Shariah-compliant warrants are typically linked to the underlying Shariah-compliant equities and therefore subject to those risks. However, the price, performance and liquidity of such Shariah-compliant warrants will generally fluctuate more than the underlying Shariah-compliant equities because of the greater volatility of the warrants market. The erosion of value of the Shariah-compliant warrants may accelerate as the Shariah-compliant warrants approach its expiry date and the potential gains from a favourable price movement of the underlying Shariah-compliant equities may be offset by time decay.</p>
<p><b>Currency risk</b></p>	<p>As the investments of the target fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the target fund in the base currency and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.</p> <p>The impact of the exchange rate movement between the base currency of the target fund and the currency of the underlying investments may result in a depreciation of the value of the investments as expressed in the base currency of the target fund.</p>

**RISKS (CONTINUED)**

**Reclassification of Shariah status risk**

This risk refers to the risk that the currently held Shariah-compliant equities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the equities by the Shariah Advisory Council of the Securities Commission (SACSC), the Shariah Adviser or the Shariah Boards of the relevant Islamic indices. If this occurs, Aberdeen Standard and the External Investment Manager will take the necessary steps to dispose of such equities. There may be opportunity loss to the target fund due to the target fund not being allowed to retain the excess capital gains derived from the disposal of the Shariah non-compliant equities. Aberdeen Standard and the External Investment Manager will be required to dispose of these equities immediately if the market price is above the investment cost. Should the market price be below the investment cost, Aberdeen Standard and the External Investment Manager may choose to hold on to these holdings until the market price meets the investment cost. Nevertheless, should Aberdeen Standard and the External Investment Manager decide to dispose of these equities below the investment cost, the target fund will be faced with the risk of realising its losses, thus negatively impacting the NAV of the target fund.

**Emerging and developing markets risk**

In emerging and developing markets, the legal, judicial and regulatory infrastructure is still developing and there are much legal uncertainties both for the local market participants and their overseas counterparts. As the emerging and developing markets carry significant risks, investors should therefore ensure that, before investing in the target fund, they understand the relevant risks and are satisfied that an investment in the target fund is suitable.

**Taxation**

Investors should note in particular that the proceeds from the sale of Shariah-compliant securities in some markets or the receipt of any dividends or other income by the target fund may be or may become subject to tax, levies, duties or other fees or charges imposed by the authorities in that market, including taxation levied by withholding at the source. Tax law and practices in certain countries into which the target fund invests or may invest in the future (in particular emerging and developing markets) is not clearly established. It is possible that the current interpretation of the law or understanding of practice might change, or that the law might be changed with retrospective effect. It is also possible that the target fund could become subject to additional taxation in such countries that is not anticipated either at the date of this prospectus or when investments are made, valued or disposed of.

**Execution and Counterparty Risk**

In some markets, there may be no secure method of delivery against payment which would avoid exposure to counterparty risk. It may be necessary to make payment on a purchase or delivery on a sale before receipt of the Shariah-compliant securities or, as the case may be, sale proceeds.
