FUND MANAGER'S COMMENTS

The Fund delivered 0.24% in November 2023, which was underperforming the benchmark by 1bps and delivered 3.32% in the 12-months period ending 30 November 2023, outperforming the benchmark by 40bps.

Bank Negara Malaysia kept its monetary policy rate unchanged again at 3.00% during its MPC meeting in November for a third straight meeting which was largely within market consensus. BNM said it will ensure the monetary policy stance remains conducive to sustain economic growth amid price stability. Industrial Production Index (IPI) fell by 0.5% YoY September, weighed mostly by the mining sector's oil and gas activities, after a 0.3% decline last August. Nonetheless, the index expanded by 1.1% monthly, after a growth of 2.8% in August. Malaysia's economic growth accelerated in the third quarter as consumer spending along with services and construction sectors helped counter the impact of faltering exports. GDP expanded 3.3% in 3Q YOY, in line with the preliminary reading last month and from a 2.9% gain in 2Q.

Headline inflation, measured by the Consumer Price Index (CPI), continued to slow to 1.8% in October 2023, with the index points recorded at 130.9, compared with 128.6 a year ago. This is lower than the 1.9% increase recorded in September and marks the second straight month that inflation is easing. Meanwhile, core inflation was lower at 2.4% (Sept: 2.5%) during the month. The moderation was due to lower inflation for selected services including food away from home and repair and maintenance of personal transport. Exports contracted at a slower pace of 4.4% (Sept: -13.8%) reflecting improvement in both manufactured and commodities exports. Manufactured exports recorded smaller declines in both E&E and non-E&E exports. Meanwhile, commodities exports were supported by improved palm oil exports. Looking ahead, exports are expected to gradually improve towards the end of the year. Downside risks remain, stemming from weaker external demand.

We limit our investment exposure to short-term deposit placements due to the very low risk nature of the Fund

RISKS

Returns not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the target fund's investment objective will be achieved.
General market environment risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the target fund's NAV.
Inflation risk	This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments.
Manager's risk	This risk refers to the day-to-day management of the target fund by Principal which will impact the performance of the target fund, e.g. investment decisions undertaken by Principal as a result of an incorrect view of the market may adversely affect the performance of the target fund.
Reclassification of Shariah non-compliant status risk	This risk refers to the risk that the currently held Shariah-compliant securities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia (SACSC), the Shariah adviser, the Shariah boards of the relevant Islamic indices or the Shariah adviser of the issuer.
Credit and default risk	<p>Investment of the target fund may involve a certain degree of credit and default risk. Generally, credit and default risk is the risk of loss due to the counterparty's and/or issuer's non-payment or untimely payment of the investment amount as well as the returns on investment. Principal aim to mitigate this risk by performing fundamental credit research and analysis to determine the creditworthiness of its counterparty and/or issuer.</p> <p>Investment in the target fund is not the same as placing funds in a Shariah-compliant deposit with a licensed Islamic financial institution. There are risks involved and investors should rely on their own evaluation to assess the merits and risks when investing in the target fund.</p>
