## FUND MANAGER’S COMMENTS

The Fund delivered 0.12% in the month of November 2021, underperforming the benchmark by 2bps, and delivered 1.47% in the 12-months period ending November 2021, underperforming the benchmark by 12bps.

The end of November 2021 saw investors seeking flight to safe havens with fear and uncertainty being the key factors following the news of the heavily mutated Omicron variant.

As at 5 Dec 2021, Malaysia’s first dose/fully vaccinated ratio currently stands at 79.2%/77.9% of the total population. (98.5%/97.1% of the adult population and 90%/86.5% for adolescents). As for booster shots, it has reached around 8.35% of the total population. On that note, R0 however is on the rise which needs to be monitored.

Malaysia’s CPI increased by 2.9% in October 2021 from a year earlier on factors including rising fuel prices and discontinuation of electricity bill discounts by the government. MoM, CPI increased by 0.7% whilst YTD, the CPI increased by 2.3% between January to October 2021.

The Malaysian economy contracted by -4.5% YoY in 3Q2021 (2Q2021:+16.1% YoY) which was largely due to the strict containment measures particularly in July under the National Recovery Plan. The construction sector contracted the most during the period with domestic demand declining by 4.1% YoY (2Q2021: +12.4%) weighed down mainly by the contraction in private consumption and investment activities, while continued increase in public sector consumption spending provided support to growth.

We limit our investment exposure to short-term Islamic deposit placements due to the very low risk nature of the Fund.
