*Dear Valued Client,*

Despite the economic volatility and challenging environment in 2020, we at Sun Life Malaysia managed to overcome all odds and continued our upward growth trajectory amidst the turbulence caused by the pandemic. With that, we are very pleased to present our Takaful Investment-Linked Fund Performance Report for 2020 that reflected our results and amazing journey in triumphing over the adversity following an unprecedented year. We would like to extend our sincere gratitude and appreciation for your support and trust in our investment-linked protection plans.

2020 has been one of the most volatile and challenging years with the Coronavirus (COVID-19) pandemic distress, testing all of us in many different ways. The continuing threat of the disease caused a dramatic impact on the economy and financial markets. Similar to the saying that "every cloud has a silver lining", 2020 also provided unusual pockets of opportunity for regional and global markets to outperform.

### **Market Overview**

After COVID-19 first raised attention across the world in January 2020, the rapid spread of the virus and rising number of confirmed cases triggered quick reactions from the governments worldwide to take unprecedented steps of locking down their countries and restricted economic, social, and cross-border activities. While these measures were necessary in dealing with the unprecedented situation, it also led to significant disruptions across the global economy and supply chain that affected businesses in almost all sectors and ultimately, employees. To cushion the impact on economic output and employment, a large amount of fiscal stimulus was announced by the respective governments, including Malaysia, to help businesses and small medium enterprises (SMEs) stay afloat during this difficult period while minimising job losses.

### **Market Overview (continued)**

Against this backdrop, there was an initial wave of panic selling in the financial markets which caused the value of all assets to drop dramatically as investors liquidated their holdings for the safety of cash. Central banks, having learned the lessons from the past financial crises, unleashed a large amount of liquidity into the financial system, via a combination of aggressive monetary loosening and quantitative easing, to alleviate this stress. This flush of monies helped the financial markets to recover swiftly and in most cases, pushed asset prices to new highs.

Global equities posted another year of strong performance, diverging from the reality of economic pains being felt by the masses. In line with the strong global equities performance, our Global and Asian-focused equity investment-linked funds posted stellar returns. The local equities market, meanwhile, continued to be clouded by uncertainties from the political scene and continued foreign selling but managed to post a positive return with the bright spot being the outperformance of the Malaysian rubber glove stocks. Most of our Malaysian-focused equity investment-linked funds also posted positive returns for the year.

Malaysian fixed income market rallied along with the global fixed income markets on the back of monetary easing. At home, Bank Negara Malaysia cut the Overnight Policy Rate by a total of 1.25% to bring the policy rate to a new low of 1.75% p.a and also implemented other measures to boost liquidity in the local financial system. Our fixed income investment-linked funds posted solid returns for the year, outperforming their benchmarks.

## MARKET REVIEW AND 2021 OUTLOOK

An unprecedented year faced with Covid-19 pandemic inflicted woes and the resulting economic fall-out from the lockdowns imposed by many countries to slow the spread of the virus, despite all, both global equity and fixed income markets delivered yet another outstanding performance in 2020. At the height of the first wave of infections, strict and synchronized lockdowns across the world brought most economic activities to a sudden halt and in turn, caused unemployment to rise. To tackle this unprecedented crisis, governments inject a large amount of fiscal stimulus into the economy to cushion the economic fall-out while central banks took extraordinary steps to lower interest rates at a rapid pace and inject massive liquidity into the financial system.

Global equities kicked off the year on a positive note after the Phase 1 of the United States (US) - China trade deal was signed in January 2020. As headlines about the rapid spread of a new virus in China and then, throughout the world along with the high number of related death dominated the news, investors started becoming risk adverse. With more countries imposing restrictions after the World Health Organisation declared the Covid-19 outbreak as a pandemic on 11th March 2020, the equity markets fell swiftly during the month. The MSCI World Index dropped 54.2% from its February's peak to the March's lows while the S&P 500 index entered the into bear market in a record 33 days. However, market sentiment recovered strongly and the equities market recovered to end the year at the highs. The MSCI World Index was up by 14.1% on year-on-year basis. S&P 500 moved up by almost 70% from its March's lows to close at a new high of 3,756 despite the resurgent in Covid-19 cases and a protracted US Presidential election.

Global fixed income markets, meanwhile, started the year on a cautious note. Although the fixed income market rallied initially as more lockdowns were announced, the rally was short-lived when liquidity stress set in with investors liquidating all assets to move into cash. Amid the heightened liquidity stress, central banks acted decisively and swiftly to inject cash into the financial markets. The US Federal Reserve

(continued)

(US Fed) cut its policy rates by 150 basis points, bringing it to 0% - 0.25% range, resumed quantitative easing and provided direct lending to banks, small and medium-sized businesses and major corporations. US Dollar swap lines were also established among central banks to support the liquidity. Supported by these monetary easing measures, the FTSE World Government Bond Index returned 10.1% for the year.

Malaysia detected its first Covid-19 case on 25th January 2020 with the first locally transmitted case reported on 6th February 2020. Cases began to increase exponentially in March 2020, prompting the government to announce the Movement Control Order (MCO) on 18th March 2020 for an initial period of 2 weeks. The MCO period was extended to 8th April 2020, after which, it was replaced with other less restrictive forms of MCO. Economic activities, except those essential services, came to a standstill during the MCO period with the government projecting a RM2.4 billion economic loss per day. The unemployment rate reached a high of 5.3% in May 2020 before tapering as the economy reopened but continued to remain elevated.

Already on a slowing path at the end of 2019, Malaysia's Gross Domestic Product (GDP) contracted by -17.1% in 2Q2020 and -2.7% in 3Q2020. The 2020 full year GDP growth forecast was revised lower by Bank Negara Malaysia (BNM) from a range of -2.0% to 0.5% to the revised -5.5% to -3.5%. The adverse effects prompted the government to announce a series of stimulus packages amounting to RM318.0 billion, including a blanket 6 months loan moratorium, during the year to assist affected businesses and workers. Fiscal deficit is expected to hit 6% of GDP in 2020 with the dramatic fall in crude oil prices being an additional source of strain to the government's revenues.

The generic crude oil price fell 21.5% during the year while the US crude oil benchmark fell into negative territory for the first time in history in April 2020. Citing a weakened credit metrics among other factors, Fitch Ratings downgraded Malaysia's sovereign ratings to BBB+/stable from A-/negative in December 2020.

## **MARKET REVIEW AND 2021 OUTLOOK**

(continued)

The domestic fixed income market posted another year of robust returns with sovereign yields falling by 25bps to 115bps. To support growth, BNM cut the Overnight Policy Rate (OPR) by a total of 125 basis points (bps) to bring the policy rate to a new low of 1.75%. To support the liquidity in the domestic financial system, the Statutory Reserve Requirements (SRR) for financial institutions was reduced by 100bps to 2.00% and BNM also granted the flexibility for financial institutions to use the Malaysian sovereign bond/sukuk to meet the SRR requirements. The local fixed income market also benefitted from the participation of foreign investors with a recorded inflow of RM18.3 billion during the year.

The domestic equity market, following the global trend, also saw a massive sell-off in 1Q2020 before recovering to record positive returns despite the economic hardship felt elsewhere. The FBM KLCI index posted a return of 2.4% on a year-to-year basis with gains mainly attributed to the outperformance in the healthcare sector, in particular the rubber glove manufacturers. Domestic political issues and the persistent foreign outflows, totaling RM24.8 billion in 2020, continue to be a drag on the local equities. Another bright spot for the local market in 2020 was the return of local retail investors.

Heading into 2021, the anticipation of another large fiscal stimulus from the incoming US President Biden administration, the optimism from the rapid vaccine development and the hope of returning to normal activities had prompted the forecast of a global economic recovery. Global interest rates are expected to remain supportive at current low levels. However, concerns remained on the emergence of new mutated Covid-19 strains, the access to Covid-19 vaccines, especially among the less developed countries, and the rate of vaccinations which could delay economic recovery. Continued US-China tensions and other conflicts between China and other countries could also derail global trade activities. Given the massive liquidity injection in the past year, higher than expected inflationary pressure could prompt policymakers to take action.

## **MARKET REVIEW AND 2021 OUTLOOK**

*(continued)*

For Malaysia, the official projection is for a recovery in the country's growth rate of 6.5% to 7.5%, supported by infrastructure projects as announced in Budget 2021. Total allocations under Budget 2021 amounted to RM322.5 billion with one key beneficiary being the B40 segment which should support consumption. Inflation is expected to remain subdued, allowing for the current accommodative monetary stance to continue. Investors will also be paying close attention to the rating actions of the other 2 international rating agencies as any adverse actions may affect investors' sentiment towards Ringgit assets.

Based on the above global and domestic outlook, we are defensive on the domestic fixed income market while looking for opportunities in the equities market. An extreme downside in either market may present an opportunity to invest at a cheaper price. Our main investment strategies will continue to be asset-liability driven while we actively manage the portfolios to minimize the downside impact.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial information.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- (a) Identify and assess the risks of material misstatement of the financial information, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (b) Obtain an understanding of internal control relevant to audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Manager's internal control.

(continued)

## **REPORT ON THE FINANCIAL INFORMATION (continued)**

### **Auditors' responsibilities for the audit of the financial information (continued)**

- (c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Manager.
- (d) Conclude on the appropriateness of the Manager's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial information or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Funds to cease to continue as a going concern.

We communicate with the Manager regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## *Pelanggan Yang Dihormati,*

Meskipun suasana tahun 2020 sungguh mencabar penuh dengan ketidaktentuan ekonomi akibat kesan pandemik COVID-19, kami di Sun Life Malaysia berjaya menempuh halangan demi halangan dan mencatatkan pertumbuhan baik yang berkekalan. Di sini, kami dengan sukacitanya membentangkan Laporan Prestasi Dana Insurans Berkaitan-Pelaburan Takaful untuk 2020 yang mencerminkan keputusan korporat dan kejayaan kami dalam mengharungi dan menangani kegetiran pada tahun yang luar biasa ini. Kami juga ingin merakamkan penghargaan ikhlas dan terima kasih atas sokongan dan keyakinan anda untuk pelan-pelan perlindungan berkaitan-pelaburan kami.

2020 juga menyaksikan situasi negara yang sentiasa bergolak akibat penularan pandemik Coronavirus (COVID-19) yang telah menguji manusia dalam pelbagai aspek. Ancaman wabak yang berterusan ini telah memberi kesan yang dahsyat ke atas ekonomi dan pasaran kewangan. Bak kata pepatah “setiap ujian ada hikmahnya”, tahun 2020 juga telah memberi peluang yang tidak dijangka untuk pasaran serantau dan global dalam mencatat prestasi yang cemerlang.

### **Ulasan Pasaran**

Apabila COVID-19 mula meraih perhatian dunia pada Januari 2020 disusuli penularan wabak yang pantas dan kes jangkitan positif meningkat secara mendadak, kerajaan di seluruh dunia terpaksa mengambil langkah yang drastik dan pantas iaitu menutup sempadan negara dan menyekat aktiviti ekonomi, sosial serta aktiviti rentas daerah dan negeri. Walaupun langkah-langkah yang diambil ini penting untuk menangani situasi yang tidak pernah terjadi ini, ia telah memberi kesan kepada aktiviti ekonomi global dan rantaian bekalan justeru menjelaskan hampir kesemua sektor perniagaan dan juga pekerja-perkerjanya. Untuk menampar kesan ke atas pengeluaran ekonomi dan pekerjaan, pelbagai rangsangan fiskal telah diumumkan oleh kerajaan masing-masing, termasuk Malaysia, untuk membantu perniagaan dan perusahaan kecil dan

sederhana (PKS) menjamin daya tahan semasa tempoh sukar ini di samping mengurangkan kadar pengangguran.

Berlatarkan suasana ini, pada awalnya terdapat aliran penjualan panik di pasaran kewangan yang menyebabkan susutan nilai semua aset apabila pelabur mencairkan pegangan mereka untuk pegangan tunai yang lebih selamat. Bank-bank pusat, yang berpengalaman menangani krisis kewangan terdahulu, bertindak untuk melegakan tekanan ini dengan menyuntik jumlah kecairan yang besar ke dalam sistem kewangan melalui gabungan pelonggaran kewangan yang agresif dan pelonggaran kuantitatif. Aliran masuk wang tunai ini telah membantu pasaran kewangan pulih dengan pantas dan dalam kebanyakan kes, menolak harga aset ke tahap yang lebih tinggi.

Ekuiti global mencatatkan satu lagi prestasi tahunan yang cemerlang, menyimpang daripada realiti kegusaran ekonomi yang dirasai oleh masyarakat. Sejarah dengan prestasi ekuiti global yang kukuh, dana-dana berkaitan-pelaburan kami yang memberi tumpuan kepada pasaran Asia dan Global telah merekodkan pulangan yang mengagumkan. Pasaran ekuiti tempatan pula terus dibayangi ketidakpastian dari sisi politik dan jualan asing yang berterusan, namun masih berjaya mencatatkan pulangan positif dengan tumpuan kepada prestasi hebat saham sarung tangan getah Malaysia. Kebanyakan dana-dana berkaitan-pelaburan ekuiti tumpuan-Malaysia turut memberikan pulangan positif bagi tahun ini.

Pasaran pendapatan tetap Malaysia mengalami lonjakan yang sejajar dengan pasaran pendapatan tetap global bersandarkan pelonggaran kewangan. Di dalam negara, Bank Negara Malaysia menurunkan Kadar Dasar Semalam berjumlah 1.25% untuk membawa kadar dasar ke paras rendah 1.75% setahun dan melaksanakan beberapa langkah lain bagi memangkin kecairan di dalam sistem kewangan tempatan. Dana-dana berkaitan-pelaburan pendapatan tetap kami mencatatkan pulangan kukuh bagi tahun ini, mengatasi penanda aras mereka.

## **ULASAN PASARAN DAN UNJURAN 2021**

Tahun yang mencabar dan sukar berikutan pandemik Covid-19 yang mengakibatkan kejatuhan ekonomi disebabkan oleh penutupan sempadan yang dilaksanakan oleh kebanyakan negara untuk memperlahangkan penularan virus. Walaupun berdepan dengan situasi yang mencabar, pasaran Ekuiti dan Bon global telah berjaya mencatatkan prestasi di luar jangkaan pada tahun 2020. Di awal gelombang pertama jangkitan, kawalan pergerakan ketat yang dilaksanakan di seluruh dunia telah memperlahangkan aktiviti ekonomi secara mengejut sekaligus memberi kesan kepada peningkatan kadar pengangguran. Untuk menangani krisis yang belum pernah dihadapi sebelum ini, kerajaan telah menyuntik sejumlah besar pakej rangsangan untuk menampung kejatuhan ekonomi manakala bank-bank pusat pula mengambil langkah luar biasa untuk menurunkan kadar faedah dengan pantas dan juga menyalurkan kecairan besar-besaran ke dalam sistem kewangan.

Ekuiti global bermula secara positif pada awal tahun berikutan Fasa 1 persetujuan dagangan Amerika Syarikat (AS) – China yang ditandatangani pada Januari 2020. Tatkala berita mengenai penularan pantas virus baharu di China, dan kemudiannya di seluruh dunia diikuti angka kematian yang tinggi mula menjadi perhatian global, pelabur mula mengambil langkah untuk mengurangkan risiko perlaburan. Selepas Pertubuhan Kesihatan Sedunia (WHO) mengisyiharkan penularan Covid-19 sebagai pandemik pada 11hb Mac 2020, lebih banyak negara mengenakan sekatan mengakibatkan pasaran ekuiti mengalami kejatuhan yang teruk pada bulan tersebut. Indeks MSCI World jatuh 54.2% daripada paras tertinggi Februari kepada terendah bulan Mac manakala indeks S&P 500 pula memasuki pasaran menurun dengan rekod 33 hari. Bagaimanapun, sentimen pasaran beransur pulih dengan pasaran ekuiti mengalami pemulihan yang agak ketara dan mengakhiri tahun dengan cemerlang. Indeks MSCI World naik 14.1% berbanding tahun lepas. S&P 500 meningkat hampir 70% dari paras rendah Mac untuk ditutup pada paras tertinggi 3,756 walaupun kes Covid-19 kembali meningkat dan pemilihan Presiden AS yang berpanjangan.

## **ULASAN PASARAN DAN UNJURAN 2021**

(sambungan)

Sementara itu, pasaran bon global memulakan tahun dengan kadar berhati-hati. Walaupun pada awalnya pasaran bon mengalami permintaan tinggi semasa lebih banyak kawalan pergerakan dilaksanakan, kenaikan tersebut hanyalah bersifat sementara dan tekanan kecairan mula dirasai apabila pelabur mula mencairkan semua aset dan beralih kepada tunai. Berikutan peningkatan tekanan kecairan, bank-bank pusat bertindak pantas dengan menyalurkan tunai ke dalam pasaran kewangan. Rizab Persekutuan AS (Fed AS) memotong kadar pinjaman sebanyak 150 mata asas, menjadikannya dalam julat 0% - 0.25%, mendokong pelonggaran kuantitatif dan juga menyediakan pinjaman terus kepada bank, perniagaan bersaiz kecil, sederhana dan besar. Bank pusat juga menetapkan kadar "swap line" Dolar AS untuk menyokong kecairan. Langkah-langkah kewangan yang telah diambil ini telah mengakibatkan Indeks FTSE World Government Bond beransur pulih kepada 10.1% untuk tahun ini.

Malaysia mengesahkan kes pertama Covid-19 pada 25hb Januari 2020 dengan jangkitan tempatan dikesan pada 6hb Februari 2020. Peningkatan kes pada Mac 2020, mendorong kerajaan untuk mengisyiharkan Perintah Kawalan Pergerakan (PKP) pada 18hb Mac 2020 dengan tempoh permulaan 2 minggu. Tempoh PKP telah dilanjutkan hingga 8hb April 2020, yang kemudiannya diganti dengan PKP bersyarat. Aktiviti ekonomi kecuali sektor-sektor penting ditutup semasa tempoh PKP dengan pihak kerajaan menganggarkan kerugian ekonomi sebanyak RM2.4 bilion setiap hari. Kadar pengangguran mencécah setinggi 5.3% pada Mei 2020 sebelum mula menurun apabila ekonomi dibuka semula namun masih kekal pada paras yang amat tinggi.

Bermula dengan pertumbuhan yang perlahan pada akhir 2019, Keluaran Dalam Negara Kasar (KDNK) Malaysia mengecut sebanyak -17.1% pada 2Q2020 dan -2.7% pada 3Q2020. Berdasarkan pencapaian itu, Bank Negara Malaysia (BNM) telah menurunkan pertumbuhan KDNK pada tahun 2020 dari anggaran -2.0% hingga 0.5% ke -5.5% hingga -3.5%. Situasi semasa yang tidak stabil mendorong kerajaan untuk mengumumkan pelbagai pakej rangsangan berjumlah RM318.0 bilion, termasuk moratorium pinjaman menyeluruh selama 6 bulan, untuk membantu perniagaan

dan pekerja yang terjejas. Defisit fiskal dijangka mencecah 6% KDNK pada 2020 dengan kejatuhan dramatik harga minyak mentah juga menjelaskan perolehan kerajaan.

Harga generik minyak mentah turun 21.5% manakala penanda aras minyak mentah AS jatuh ke paras negatif buat kali pertama pada April 2020. Memetik kelemahan metrik kredit sebagai salah satu faktor, Fitch Ratings menurun taraf penarafan kerajaan Malaysia kepada BBB+/stabil dari A-/negatif pada Disember 2020.

Manakala bon-bon untuk pasaran Malaysia mencatatkan pulangan tahunan yang memberangsangkan dengan pulangan kerajaan turun pada kadar 25bps sehingga 115bps. Bagi menyokong pertumbuhan, BNM memotong Kadar Dasar Semalam (OPR) sebanyak 125 mata asas (bps) untuk membawa OPR ke paras rendah baharu 1.75%. Untuk menampung kecairan dalam sistem kewangan tempatan pula, Keperluan Rizab Berkanun (SRR) untuk institusi kewangan telah dikurangkan sebanyak 100bps kepada 2.00% dan BNM turut memberikan fleksibiliti kepada institusi kewangan untuk menggunakan bon/sukuk kerajaan Malaysia bagi memenuhi syarat SRR. Pasaran pendapatan tetap Malaysia juga mendapat manfaat daripada penyertaan pelabur asing yang mencatatkan aliran masuk bernilai RM18.3 bilion pada tahun ini.

Selari dengan tren global, pasaran ekuiti tempatan turut menyaksikan pengaliran keluar besar-besaran pada 1Q2020 sebelum mengalami pemulihian untuk mencatat pulangan positif walaupun berdepan dengan kesukaran ekonomi. Indeks FTSE KLCI mencatatkan pulangan 2.4% berbanding tahun lepas dengan peningkatan kebanyakannya disumbangkan oleh prestasi cemerlang sektor penjagaan kesihatan, terutamanya pengeluar sarung tangan getah. Ketidakstabilan politik tempatan dan aliran keluar asing yang berterusan berjumlah RM24.8 bilion pada 2020, terus memperlahangkan ekuiti tempatan. Menceriakan pasaran tempatan pada 2020 adalah kembalinya pelabur runcit yang merancakkan dagangan tempatan.

## **ULASAN PASARAN DAN UNJURAN 2021**

(sambungan)

Melangkah ke 2021, pasaran menjangkakan pakej rangsangan fiskal daripada pentadbiran baharu Presiden AS Biden, di samping optimism daripada pembangunan pengeluaran vaksin serta ramalan bahawa aktiviti akan kembali normal telah mendorong unjuran bahawa akan berlaku pemulihan ekonomi global. Kadar faedah global dijangka kekal stabil pada paras rendah semasa. Bagaimanapun, masih terdapat kebimbangan akan muncul strain mutasi baharu Covid-19, terutamanya di negara kurang membangun serta, akses kepada vaksinasi yang boleh menyumbang kepada kelewatan pemulihan ekonomi. Ketegangan AS-China yang berterusan dan konflik di antara China dan negara-negara lain juga boleh menjelaskan aktiviti dagangan global. Susulan suntikan kecairan besar-besaran yang telah dilakukan tekanan inflasi dijangka meningkat dan mungkin mengakibatkan adanya tindakan susulan dari para penggubal polisi untuk mengawal kenaikan harga barang.

Manakala bagi Malaysia, kadar pertumbuhan negara kasar akan pulih pada anggaran 6.5% sehingga 7.5%, didokong oleh projek prasarana tempatan seperti yang diumumkan dalam Belanjawan 2021. Jumlah peruntukan di bawah Belanjawan 2021 bernilai RM322.5 bilion dengan penerima utama terdiri daripada segmen B40 juga di lihat mampu menggalakkan aliran wang tunai. Inflasi dijangka sederhana dan membuka peluang kepada usaha untuk mengekalkan kedudukan kewangan semasa yang akomodatif. Pelabur juga akan memberi perhatian terhadap tindakan 2 agensi penarafan antarabangsa kerana sebarang penurunan taraf yang ketara boleh menjelaskan sentimen pelabur terhadap aset dalam matawang Ringgit.

Berdasarkan ramalan perkembangan tempatan dan global di atas, kami mengambil kedudukan defensif ke atas pasaran bon Malaysia di samping mencari peluang untuk mengeksplotasi pasaran ekuiti. Kejatuhan ketara pada mana-mana pasaran boleh memberi peluang perlburuan pada harga yang lebih rendah. Justeru strategi pelaburan utama kami berasaskan pendekatan dan pengurusan aset-liabiliti yang efektif dan pada masa yang sama kami akan menguruskan portfolio secara aktif bagi mengurangkan sebarang impak negatif terhadap perlburuan.

Tanggungjawab kami di bawah standard tersebut diperjelaskan di bahagian "Tanggungjawab juruaudit ke atas audit maklumat kewangan" dalam laporan kami. Kami bebas daripada Dana-Dana selaras dengan keperluan etika yang berkaitan dengan audit ke atas maklumat kewangan di Malaysia, dan kami telah memenuhi tanggungjawab etika lain selaras dengan keperluan tersebut. Kami percaya bukti audit yang telah kami perolehi adalah mencukupi dan bersesuaian untuk menyediakan asas untuk pendapat audit kami.

### **Tanggungjawab juruaudit untuk mengaudit maklumat kewangan (continued)**

Sebagai sebahagian daripada audit yang selaras dengan standard pengauditan yang dibenarkan di Malaysia dan Standard Pengauditan Antarabangsa, kami melaksanakan pertimbangan profesional dan mengekalkan keraguan profesional sepanjang audit dijalankan. Kami juga:

Risiko tidak dapat mengesan kesilapan pernyataan material yang disebabkan oleh penipuan adalah lebih tinggi daripada yang berpunca daripada kesilapan, memandangkan penipuan boleh merangkumi pakatan sulit, pemalsuan, peninggalan sengaja, gambaran yang salah, atau melangkaui kawalan dalaman.
- (b) Mendapatkan pemahaman mengenai kawalan dalaman yang berkaitan dengan pengauditan dalam usaha untuk mencipta prosedur pengauditan yang bersesuaian dengan keadaan, tetapi bukan bertujuan untuk menyatakan pendapat mengenai keberkesanan kawalan dalaman Pengurus.

- (d) Membuat kesimpulan mengenai kewajaran penggunaan asas perakaunan usaha berterusan oleh Pengurus dan, berdasarkan bukti audit yang diperolehi, sama ada terdapat ketidakpastian material yang berkaitan dengan kejadian atau keadaan yang boleh menimbulkan keraguan ketara mengenai keupayaan Dana-Dana untuk terus beroperasi sebagai usaha berterusan. Jika kami menyimpulkan bahawa terdapat ketidakpastian material, kami dikehendaki menyatakan pendapat mengenainya dalam laporan juruaudit kami kepada pendedahan berkaitan dalam maklumat kewangan, atau jika pendedahan tersebut tidak mencukupi, untuk mengubah pendapat kami. Kesimpulan kami adalah berdasarkan bukti audit yang diperolehi sehingga tarikh laporan juruaudit kami. Bagaimanapun, kejadian atau keadaan di masa hadapan mungkin menyebabkan Dama-Dana tidak lagi beroperasi sebagai usaha berterusan.

Kami berkomunikasi dengan Pengurus mengenai, di antaranya, skop dan pemasaan yang dirancang untuk pengauditan dan penemuan audit utama, termasuk sebarang kekurangan ketara dalam kawalan dalaman yang telah kami kenalpasti semasa audit kami.
