## **CEO & PRESIDENT / COUNTRY HEAD'S MESSAGE**

(continued)

During the year, we unveiled a series of initiatives to transform and grow our business and investments and we are delighted to announce that our funds registered a stellar 65% growth rate.

At the same time, we widened our Shariah fund offerings to include a Sun Life Malaysia Islamic Global Balanced Fund to give Clients more options to asset classes to meet their investment goals.

With that, we are very pleased to present our Takaful Investment-Linked Fund Performance Report for 2021.

### **Market Overview**

In 2021, we witnessed the global economy progressing towards the recovery path but still faces significant challenges exacerbated by inflationary pressure and lingering global supply chain disruptions. The International Monetary Fund estimated that the global economy to register a 5.9% year-on-year (y-o-y) growth rate in 2021, a turnaround from -3.1% y-o-y in 2020.

The shortages in supply due to earlier movement restrictions and the sudden increase in demands when markets reopen triggered a hike in the cost of goods. The rising inflation rate, especially in advanced markets, sent an unintentional signal of a further policy tightening in the near-term which resulted in heightened volatility in the financial markets and a sell-off in the global fixed income markets.

### **Market Overview** (continued)

Closer to home, the Malaysian economy wrapped up the year with a 3.1% y-o-y gross domestic product (GDP) growth rate after experiencing two successive quarters of contraction. The positive performance is bolstered by higher private sector expenditure as well as the accelerated national COVID-19 vaccination programme that shored up domestic economic activities. Bank Negara Malaysia's move to maintain the Overnight Policy Rate unchanged at 1.75% p.a also supported the ongoing local economic recovery.

The lackluster performance of the global fixed income markets has negatively impacted the growth of the Malaysian fixed income market, despite the introduction of various support measures. Against this backdrop, the returns for our fixed income investment-linked funds were not spared from the sell-off and suffered a subdued performance.

On the other end, the global equities continued to trend upward to deliver another year of strong performance, on the back of the easing of restrictions and steady reopening of economic activities. In line with the strong performance of the global equities, our Global and Asian-focused equity investment-linked funds posted solid returns.

On contrary, the Malaysian equities market was dampened due to a series of events, amongst others, the reimposition of movement restriction orders, emergence of new COVID-19 variants, lower than expected domestic corporate earnings, political uncertainties, as well as concerns over higher taxes as tabled under Budget 2022. Notably, technology-related stocks emerged as strong performers driven by rising global demand for technology-related products.

Despite a dragged equity market performance, our Malaysian-focused equity investment-linked funds bucked the trend to deliver positive returns for the year.

## MARKET REVIEW AND 2022 OUTLOOK

The high hopes for a synchronised global economic recovery in 2021 were dashed by the ongoing mutation of the COVID-19 virus which became more virulent at each stage of its on-going evolution. This again resulted in more lockdowns in countries that were experiencing rapid increases in COVID-19 infections, hospital utilisation, deaths and had slow vaccination rollout or low initial vaccination rates. On the other hand, countries that had an early start in dispensing COVID-19 vaccination, specifically the developed countries, were able to reopen their economies earlier albeit in a measured manner. This resulted in growth disparity between the high-income nations and the low to middle income nations. Towards year end, another wave of increasing COVID-19 cases from the Omicron variant swept through the more open economies but the impacts were less severe, from both mortality and economic impact due to the higher vaccination rate and targeted measures to control the spread.

On the global front, the resumption of economic activities resulted in higher energy prices that led to a higher cost of production. The generic Brent crude oil rose 50.15% during the year to end at USD77.78 per barrel. The rapid rise in energy prices, along with supply chain disruption worldwide led to higher cost of goods resulting in rising inflation rates. At the initial stage, central banks sought to downplay the inflationary fears, noting that it was transitory in nature as the respective economies moved into the recovery phase. However, the continued high inflation numbers sparked worries that central banks would end the loose monetary policies introduced in 2020 to boost the economy suffering from pandemic-related shutdowns, earlier than expected. On 16 December 2021, the Bank of England became the first major central bank to raise its policy rates to address the inflationary concerns. The fixed income market reacted negatively to these developments. The generic United States (US) 10-year Treasury yield hit a high of 1.74% and ended the year at 1.51%, up by c.60 basis points year-on-year. Meanwhile, the FTSE World Government Bond Index recorded a negative return of 6.97% for the year.

## **MARKET REVIEW AND 2022 OUTLOOK**

(continued)

Global equities continued its uptrend during the year with the MSCI World Index posting a 20.14% return for the year, buoyed by vaccine optimism and the resumption of economic activities. Also boosting market sentiments was the announcement of a USD1.9 trillion COVID-19 relief package by President Biden in March 2021. The S&P 500 Index continued to record new highs and ended the year at 4,766.18, representing a 26.89% return. Despite the overall uptrend, there were bouts of volatility as the market grappled with the COVID-19 news flow as well as fears of persistent inflation that will lead to central banks' policy normalisation actions.

Unfortunately, Malaysia had to endure various forms of shutdowns during the year as the spread of the Delta-variant pressured the domestic healthcare system while the initial roll-out of COVID-19 vaccination was hampered by administrative delays and insufficient vaccine supply. Movement Control Order (MCO) 2.0 was implemented in four states and the Federal Territories on 13 January 2021 and was expanded to all states, except Sarawak, a few days later. Although restrictions eased over the next 2 months, MCO 3.0 was introduced nationwide on 12 May 2021 but most economic activities were allowed to operate within strict standard operating procedures. However, with infection rate remaining elevated, a more restrictive, full MCO was implemented on 1 June 2021. In mid-June, the government announced the National Recovery Plan (NRP), a four phase exit strategy from the pandemic-related restrictions, taking into consideration new infections, intensive care unit utilisation and vaccination rates for removing the restrictions. Despite the initial slow start, the nation's vaccination drive begun to ramp up in the middle of the year and made an impressive progress that saw 90% of the adult population being fully vaccinated by October, allowing most states to exit Stage 1 of the NRP.

## **MARKET REVIEW AND 2022 OUTLOOK**

(continued)

Despite the various restrictions, Malaysia's economy managed to register a growth in 2021 with Gross Domestic Product of 3.1% y-o-y, within the official revised forecast range of 3.0% to 4.0% supported by external demand and a rebound in economic activities in 4Q 2021 following the lifting of restrictive containment measures. On the fiscal front, the government also announced a total of RM75 billion in aid packages in 2021 to cushion the impact of the shutdowns. On the monetary policy front, Bank Negara Malaysia (BNM) kept the Overnight Policy Rate (OPR) unchanged at 1.75% throughout the year to support the economy. Inflation picked up by an average of 2.5% in 2021 compared to a deflation of 1.2% in 2020, due to higher fuel and food prices but was within the official projection of 2.0% to 3.0%. Despite the softer growth and stable monetary policy, the domestic fixed income market posted negative returns, driven by the volatility and sentiment of the global fixed income market. Local sovereign yields rose by 35bps to 103bps during the year. The participation of foreign investors in the local fixed income market remained healthy with an inflow of RM33.6 billion during the year.

The domestic equity market diverged from global equity trends, posting negative returns for the year. The benchmark FTSE Bursa Malaysia Kuala Lumpur Composite Index (FBMKLCI) posted a return of -3.7% while the FBM Emas Shariah Index fell 6.8% due to the negative impact from the containment measures. Market weakness was compounded further by weak Investor sentiment following the imposition of the Emergency Order in January 2021 in a bid to control the COVID-19 infections while yet another political tussle at the Federal level resulted in a change in the Prime Minister and exacerbated matters. Market sentiment recovered shortly after political stabilisation was restored following the Memorandum of Understanding between the government and the opposition but was short-lived after the announcement of a Prosperity Tax in the Budget 2022 that caught markets by surprise and sapped sentiments. Foreign outflows from the local equity market continued throughout 2021 but at a much slower pace with total net outflows of RM3.2 billion vs RM24.6 billion in 2020.

## **MARKET REVIEW AND 2022 OUTLOOK**

(continued)

Heading into 2022, the global economy is expected to remain on the recovery path but at a slower pace. The International Monetary Fund in its January 2022 report projected that global growth will moderate from an estimated 5.9% in 2021 to 4.4% in 2022. The risks to growth remain tilted to the downside as new variants of the virus may prolong the pandemic and cause new economic disruptions. Ongoing geopolitical tensions and extreme weather related events may cause volatility in key commodities. Persistent high inflation remains a major concern as inflation in the US reached its highest level in the past 40 years in January 2022 at 7.5% y-o-y after registering a 7.0% y-o-y increase in December 2021. The focus in the coming months will depend on the level of aggressiveness that the major central banks will take to adjust their monetary policy to control inflation. Any actions taken that are beyond market expectations will cause increased volatility in financial markets.

For Malaysia, the official projection is for a continued recovery in 2022 with a growth rate of 5.5% to 6.5%, supported by continued global demand and higher domestic private consumption with the improvement in labour market conditions and ongoing targeted policy support. Inflation in the country is expected to be moderate with risks to the upside on higher commodity prices arising from prolonged supply-side disruptions. Against this backdrop, there are expectations for BNM to start normalising the domestic monetary policy in the latter half of the year although BNM had signaled patience to aid in the country's recovery. Investors will also be monitoring the rating actions on the country's sovereign rating as any adverse actions may affect global investors' sentiments. There is also a possibility that the country may be headed for an early General Election in 2022 which may disrupt policy making.

Based on the above global and domestic outlook, we remain defensive on the domestic fixed income market while looking for opportunities in the equities market. Any extreme downside movements in either market may present an opportunity to invest at a discounted price.

Pada masa yang sama, kami telah meluaskan penawaran Dana-Dana Shariah yang merangkumi Dana Sun Life Malaysia Islamic Global Balanced agar dapat memberikan Pelanggan lebih banyak pilihan kelas aset yang memenuhi matlamat kewangan mereka.

Dengan ini, kami berbesar hati menyampaikan Laporan Prestasi Dana Berkaitan-Pelaburan Takaful untuk 2021.

## **Unjuran Pasaran**

Pada 2021, kita menyaksikan ekonomi global melangkah ke arah pemulihan tetapi masih berdepan dengan pelbagai cabaran yang diancam oleh tekanan inflasi dan gangguan rantaian bekalan-bekalan global. *International Monetary Fund* menganggarkan bahawa ekonomi global mencatatkan kadar pertumbuhan 5.9% tahun-ke-tahun (t-k-t) pada 2021, satu peningkatan berbanding -3.1% t-k-t pada 2020.

Kekurangan bekalan akibat sekatan pergerakan terdahulu dan peningkatan mengejut dalam permintaan semasa pasaran dibuka semula telah mencetuskan kenaikan dalam kos barang. Kadar inflasi yang meningkat terutamanya di pasaran maju secara tidak sengaja telah menghantar petanda bahawa mungkin ianya akan berlaku lagi pengetatan polisi dalam tempoh terdekat yang dijangka akan menyebabkan kadar turun naik semakin ketara di pasaran kewangan serta penjualan di pasaran pendapatan tetap global.

# **PERUTUSAN KETUA PEGAWAI EKSEKUTIF & PRESIDEN / KETUA NEGARA**

(sambungan)

## **Unjuran Pasaran** (sambungan)

Dalam negara pula, ekonomi Malaysia mengakhiri tahun dengan kadar pertumbuhan keluaran dalam negara kasar (KDNK) sebanyak 3.1% t-k-t selepas mengalami pengecutan selama dua suku berturut-turut. Prestasi positif ini dimangkin oleh perbelanjaan sektor swasta yang lebih tinggi serta program vaksinasi COVID-19 kebangsaan yang dipercepatkan telah berjaya mempergiatkan aktiviti ekonomi tempatan. Langkah Bank Negara Malaysia mengekalkan Kadar Dasar Semalaman tidak berubah pada 1.75% setahun juga telah menyokong pemulihan ekonomi tempatan yang berterusan.

Prestasi suram pasaran pendapatan tetap global telah memberi impak negatif kepada pertumbuhan pasaran pendapatan tetap Malaysia walaupun pelbagai langkah sokongan telah diperkenalkan. Berlatarkan keadaan ini, pulangan untuk Dana-Dana berkaitan-pelaburan pendapatan tetap tidak terkecuali daripada mengalami penjualan dan mencatatkan prestasi yang kurang cemerlang.

Sebaliknya, ekuiti global meneruskan trend kenaikan untuk menghasilkan satu lagi tahun yang mencatatkan prestasi kukuh bersandarkan pelonggaran sekatan dan pembukaan semula aktiviti ekonomi secara berperingkat. Seiring dengan prestasi kukuh ekuiti global, Dana-Dana berkaitan-pelaburan ekuiti tumpuan Asia dan Global kita merekodkan pulangan yang cemerlang.

Namun begitu, pasaran ekuiti Malaysia agak lembab disebabkan oleh beberapa rangkaian peristiwa, antaranya pelaksanaan semula arahan sekatan pergerakan, kemunculan varian baru COVID-19, perolehan korporat tempatan yang lebih rendah dari jangkaan, ketidakpastian politik, serta kebimbangan mengenai cukai lebih tinggi seperti yang dibentangkan dalam Belanjawan 2022. Selain itu, saham-saham berkaitan teknologi muncul dengan prestasi terbaik, dimangkin oleh permintaan global yang semakin meningkat untuk produk berkaitan teknologi.

(sambungan)

## **Unjuran Pasaran** (sambungan)

Walaupun prestasi pasaran ekuiti agak ketinggalan, Dana-Dana berkaitan-pelaburan ekuiti tumpuan Malaysia telah menongkah arus untuk menjana pendapatan positif bagi tahun ini.

## ULASAN PASARAN DAN UNJURAN 2022

Harapan untuk menyaksikan pemulihan serentak ekonomi global pada tahun 2021 merundum akibat mutasi berterusan virus COVID-19 yang lebih agresif pada setiap peringkat evolusinya. Ini mengakibatkan lebih banyak penutupan di negara-negara yang mengalami peningkatan pesat dalam jangkitan COVID-19, kadar penggunaan hospital dan kematian yang tinggi disebabkan peratus vaksinasi awal yang rendah. Sebaliknya, negara-negara yang memulakan pemberian vaksinasi COVID-19 lebih awal khususnya negara maju telah mula membuka semula ekonomi secara beransur-ansur. Ini menjarakkan lagi jurang pertumbuhan antara negara-negara berpendapatan tinggi dan rendah hingga sederhana. Menjelang akhir tahun, terjadi lagi gelombang peningkatan kes COVID-19 daripada varian Omicron yang memberi kesan ekonomi yang tidak ketara dan kadar kematian yang rendah disebabkan oleh peratusan vaksinasi yang tinggi dan langkah bersasar untuk mengawal penyebaran.

Di peringkat global, pembukaan semula aktiviti ekonomi menyumbang kepada peningkatan harga pengeluaran tenaga. Menjelang akhir tahun minyak mentah Brent meningkat 50.15% kepada USD77.78 setong. Kenaikan harga tenaga, serta gangguan rantaian bekalan global mengakibatkan peningkatan kos barang dan menyumbang kepada angka inflasi yang tinggi. Pada peringkat awal, bank pusat menolak keimbangan mengenai inflasi, dengan menyatakan bahawa ia adalah bersifat sementara tatkala ekonomi masing-masing bergerak ke fasa pemulihan. Walau bagaimanapun, inflasi yang tinggi mencetuskan keimbangan bahawa bank pusat akan menamatkan dasar monetari longgar yang diperkenalkan pada 2020 untuk merangsang ekonomi yang terjejas akibat penutupan disebabkan pandemik, lebih awal daripada jangkaan. Pada 16 Disember 2021, Bank of England menjadi bank pusat utama pertama yang menaikkan kadar dasarnya untuk menangani keimbangan inflasi. Pasaran pendapatan tetap memberi reaksi negatif terhadap perkembangan ini. Pulangan Perbendaharaan 10-tahun Amerika Syarikat (AS) mencecah setinggi 1.74% dan mengakhiri tahun pada 1.51%, naik 60 mata asas tahun-ke-tahun. Sementara itu, Indeks FTSE World Government Bond mencatatkan pulungan negatif sebanyak 6.97% bagi tahun semasa.

## **ULASAN PASARAN DAN UNJURAN 2022**

(sambungan)

Ekuiti global meneruskan trend meningkat bagi tahun semasa dengan Indeks MSCI World mencatatkan pulangan 20.14%, dirangsang oleh keyakinan terhadap populasi vaksin dan pembukaan semula aktiviti ekonomi. Turut merangsang sentimen pasaran adalah pengumuman pakej bantuan COVID-19 bernilai USD1.9 trilion oleh Presiden Biden pada Mac 2021. Indeks S&P 500 terus mencatat paras tertinggi baharu dan mengakhiri tahun semasa pada 4,766.18, pulangan sebanyak 26.89%. Walaupun pasaran pulih secara keseluruhannya, berlaku ketidaktentuan apabila pasaran bergelut dengan aliran berita COVID-19 serta kebimbangan inflasi berpanjangan yang akan membawa kepada tindakan normalisasi dasar oleh bank pusat.

Malangnya, Malaysia terpaksa mengharungi pelbagai penutupan sepanjang tahun disebabkan oleh penyebaran varian Delta yang menghimpit sistem kesihatan tempatan tatkala pelancaran vaksinasi awal COVID-19 terhalang oleh ketidakstabilan pentadbiran dan bekalan vaksin yang tidak mencukupi. Perintah Kawalan Pergerakan (PKP) 2.0 telah dilaksanakan di empat negeri dan Wilayah Persekutuan pada 13 Januari 2021 dan diperluaskan ke semua negeri, kecuali Sarawak, beberapa hari kemudian. Walaupun sekatan dilonggarkan dalam tempoh 2 bulan kemudian, PKP 3.0 pula dilaksanakan di seluruh negara pada 12 Mei 2021 walaupun aktiviti ekonomi dibenarkan beroperasi dengan prosedur standard yang ketat. Bagaimanapun, dengan kadar jangkitan kekal tinggi, PKP penuh yang lebih ketat telah dikuatkuasakan pada 1 Jun 2021. Pada pertengahan Jun, kerajaan mengumumkan Pelan Pemulihan Nasional (PPN), yang merangka empat fasa strategi keluar dari situasi pandemik, dengan mengambil kira jangkitan baharu, penggunaan unit rawatan rapi dan kadar vaksinasi bagi menamatkan sekatan. Bermula agak perlahan, pemberian vaksinasi negara mula meningkat pada pertengahan tahun dan mencapai kemajuan yang mengagumkan di mana 90% populasi dewasa telah divaksin sepenuhnya menjelang Oktober, membolehkan kebanyakan negeri keluar daripada Fasa 1 PPN.

## **ULASAN PASARAN DAN UNJURAN 2022**

(sambungan)

Walaupun mengharungi pelbagai sekatan, ekonomi Malaysia berjaya mencatatkan pertumbuhan Keluaran Dalam Negara Kasar sebanyak 3.1% t-k-t, dalam lingkungan rasmi julat ramalan 3.0% - 4.0% disokong oleh permintaan luar dan pembukaan semula aktiviti ekonomi pada penggal keempat 2021 selepas penarikan langkah-langkah kawalan pembendungan. Dari segi fiskal, kerajaan juga mengumumkan pakej bantuan RM75 bilion pada 2021 untuk mengurangkan kesan akibat penutupan. Dari segi monetari pula, Bank Negara Malaysia (BNM) mengekalkan Kadar Dasar Semalam (OPR) pada 1.75% sepanjang tahun untuk menyokong ekonomi. Inflasi meningkat secara purata 2.5% pada 2021 berbanding deflasi 1.2% pada 2020, disebabkan oleh harga bahan api dan barang makanan yang lebih tinggi tetapi masih di lingkungan unjuran rasmi 2.0% - 3.0%. Di persekitaran pertumbuhan yang perlanaan dan dasar monetari yang stabil, pasaran bon tempatan mencatatkan pulangan negatif, didorong oleh ketidakstabilan dan sentimen pasaran pendapatan tetap global. Pulangan bon kerajaan meningkat 35bps kepada 103bps bagi tahun semasa. Penyertaan pelabur asing dalam pasaran bon kekal sihat dengan aliran masuk RM33.6 bilion pada tahun semasa.

Pasaran ekuiti tempatan berbeza berbanding aliran ekuiti global dan mencatatkan pulangan negatif bagi tahun semasa. Penanda aras Kuala Lumpur FTSE Bursa Malaysia (FBMKLCI) mencatatkan pulangan sebanyak -3.7% manakala Indeks Syariah Emas FBM jatuh 6.8% akibat kesan negatif daripada perlaksanaan langkah pembendungan. Kelembapan pasaran berikutan sentimen negatif pelabur terhadap perlaksanaan Perintah Darurat pada Januari 2021 dalam usaha untuk mengawal jangkitan COVID-19 dan juga ketidakstabilan politik di peringkat Persekutuan telah menyaksikan pertukaran Perdana Menteri memburukkan lagi keadaan. Sentimen pasaran pulih setelah landskap politik kembali stabil dengan pemergerian Memorandum Persefahaman antara kerajaan dan pembangkang walaupun ia bertahan agak singkat setelah Cukai Kemakmuran yang dibentangkan dalam Bajet 2022 mengejutkan dan melemahkan sentimen pasaran. Aliran keluar asing daripada pasaran ekuiti tempatan berterusan sepanjang 2021 tetapi pada kadar yang lebih perlanaan dengan jumlah aliran keluar bersih RM3.2 bilion berbanding RM24.6 bilion pada 2020.

## **ULASAN PASARAN DAN UNJURAN 2022**

(sambungan)

Melangkah ke tahun 2022, ekonomi global dijangka kekal dalam landasan pemulihan dan tumbuh pada kadar yang lebih perlahan. *International Monetary Fund* dalam laporan Januari 2022 mengunjurkan pertumbuhan global akan menjadi sederhana daripada anggaran 5.9% pada 2021 kepada 4.4% pada 2022. Risiko untuk pertumbuhan kekal di sisi bawah kerana varian baharu virus mungkin melanjutkan tempoh pandemik dan menimbulkan gangguan baharu terhadap ekonomi. Ketegangan geopolitik yang berterusan dan keadaan cuaca yang melampau mungkin menyebabkan komoditi utama tidak stabil. Inflasi tinggi yang berpanjangan menjadi kebimbangan utama apabila AS mencapai paras tertinggi dalam tempoh 40 tahun pada Januari 2022 dengan kadar 7.5% t-k-t selepas mencatatkan kenaikan 7.0% t-k-t pada Disember 2021. Tumpuan pada bulan-bulan akan datang akan bergantung pada tahap keagresifan yang akan diambil oleh bank pusat utama untuk menyelaraskan dasar monetari bagi mengawal inflasi. Sebarang tindakan luar jangkaan yang diambil akan menyebabkan ketidakstabilan pasaran kewangan.

Bagi Malaysia, unjuran rasmi merangkumi pemulihan berterusan pada 2022 dengan kadar pertumbuhan 5.5% hingga 6.5%, disokong oleh permintaan global yang berterusan dan permintaan swasta tempatan yang lebih tinggi dan juga pemulihan pasaran buruh dan sokongan berterusan dalam negara. Inflasi dijangka sederhana dengan risiko ke sisi atas berikutan kemungkinan harga komoditi yang lebih tinggi akibat gangguan bekalan yang berpanjangan. Berdasarkan keadaan ini, terdapat jangkaan bahawa BNM akan menormalisasikan dasar monetari tempatan pada suku tahun kedua setelah mengambil pendekatan yang lembut dalam menangani pemulihan negara. Pelabur juga akan memantau penarafan negara dengan sebarang tindakan memudaratkan boleh menjelaskan sentimen pelabur global. Terdapat kebarangkalian bahawa negara mungkin akan berdepan Pilihan Raya Umum lebih awal pada tahun 2022 yang berkemungkinan mengganggu penggubalan dasar ekonomi dalam negara.

Berdasarkan ramalan perkembangan tempatan dan global di atas, kami mengambil kedudukan defensif ke atas pasaran bon Malaysia di samping mencari peluang untuk mengeksplorasi pasaran ekuiti. Kejatuhan ketara pada mana-mana pasaran boleh memberi peluang perlaburan pada harga yang lebih rendah.
