Sun Life Malaysia Global Technology Fund

September 2026

FUND MANAGER'S COMMENTS

The Fund gained 5.23% during the month, outperforming its benchmark by 0.80%.

Global equities ended the third quarter of 2026 modestly higher, with several major indices reaching new highs despite a challenging macroeconomic environment. Investor sentiment remained resilient amid elevated geopolitical tensions, rising oil prices, continued monetary tightening by central banks, new US tariff announcements, and higher US Treasury yields. Market performance was highly concentrated, with gains primarily driven by the energy, information technology (IT), health care and communication services sectors. Within technology, enthusiasm surrounding artificial intelligence (AI) continued to support cloud infrastructure, enterprise software and digital platform-related companies. However, parts of the AI supply chain, particularly semiconductors and related hardware segments, experienced increased volatility as investors assessed competitive pressures, funding requirements for large-scale data center projects, and return-on-capital considerations.

Looking ahead, the outlook for the technology sector remains constructive. AI infrastructure investment continues to be supported by strong hyperscaler spending, increasing enterprise adoption and improving economic returns. As AI adoption broadens beyond infrastructure, opportunities are expected to emerge across software, cybersecurity, fintech, healthcare, robotics and other application-focused industries, potentially supporting a wider range of technology leaders in the coming quarters.

We recommend that you read and understand the contents of the Principal Global Technology Fund Information Memorandum No.2 dated 31 December 2019, which have been deposited with Securities Commission Malaysia before investing and that you keep the said Information Memorandum for your record. Any issue of units to which the Information Memorandum relates will only be made upon receipt of the completed application form referred to in and accompanying the Information Memorandum, subject to the terms and conditions therein. The principal risks are returns not guaranteed, market risk, inflation risk, and loan financing risk. The specific risks of the Fund are Fund manager risk, country risk and currency risk. You can obtain a copy of the Information Memorandum from the head office of Principal Asset Management Berhad or from any of our approved distributors. We suggest that you consider thesefees and charges carefully prior to making an investment. Unit prices and income distributions, if any, may fall or rise. Past performance is not reflective of future performance and income distributions are not guaranteed. Product Highlight Sheet ("PHS") is available and that investors have the right to request for a PHS; and the PHS and any other product disclosure document should be read and understood before making any investment decision. There are fees and charges involved in investing in the funds. We suggest that you consider these fees and charges carefully prior to making an investment. Unit prices and income distributions, if any, may fall or rise. Past performance is not reflective of future performance and income distributions are not guaranteed. You are also advised to read and understand the contents of the Financing for Investment in Unit Trust Risk Disclosure Statement/Unit Trust Loan Financing Risk Disclosure Statement before deciding to borrow to purchase units. All performance figures have been extracted from Lipper. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from pre-unit split NAV/cum-distribution NAV to post-unit split NAV/exdistribution NAV; and where a unit split is declared, the value of your investment will remain unchanged after the distribution of the additional units.

RISKS

All investment carries some form of risks. The potential key risks include but are not limited to the following:

Returns not guaranteed	The investment of the target fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the target fund's investment objective will be achieved.
Market risk	The value of an investment will decrease or increase due to changes in market factors i.e. economic, political or other events that impact large portions of the market. Market risk cannot be eliminated, hence the target fund's investment portfolio may be prone to changing market conditions that may result in uncertainties and fluctuations in the value of the underlying of the target fund's investment portfolio, causing the NAV or prices of units to fluctuate.
Inflation risk	This is the risk of your investment in the target fund not growing or generating income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the nominal value of the investment in monetary terms has increased.
Currency risk	Currency risk is applicable to class(es) (e.g. Class MYR) which is in a different currency than the base currency of the Fund (i.e. USD). The impact of the exchange rate movement between the base currency of the fund and the currency denomination of the respective classes may result in a depreciation of the value of your holdings as expressed in the base currency. As for the hedged class, the class itself provides mitigation to the currency risk arising from the difference between the currency denomination of the class and the base currency. While Principal aims to fully hedge the currency risk for a hedged class, you should note that it may not entirely eliminate currency risk. In addition, as a result of hedging, a hedged class will not be able to enjoy the full benefits of the currency movement in the event of a favourable movement of the currency denomination of the hedged class against the base currency of the fund. You should also note that hedging incurs costs which will impact the NAV of a hedged Class.
Manager's risk	Since the target fund invests into a collective investment scheme (CIS) managed by another manager, the master fund's manager has absolute discretion over the target fund's investment technique and knowledge, operational controls and management. In the event of mismanagement of the master fund, the NAV of the target fund, which invests into the master fund would be affected negatively.
Country risk	As the target fund invests in the master fund which is domiciled in Luxembourg, the target fund's investments in the master fund may be affected by risks specific to Luxembourg. Changes to laws and regulations of Luxembourg may have an adverse impact on the master fund, and consequently the target fund.

September 2026

RISKS (CONTINUED)

All investment carries some form of risks. The potential key risks include but are not limited to the following:

Biotechnology, Communication and Technology Sectors risk	Investment in the biotechnology, communication and technology sectors may present a greater risk and a higher volatility than investment in a broader range of securities covering different economic sectors. In addition, these sectors may be subject to greater government regulation than other sectors and, as a result, changes to such government regulation may have a material adverse effect on these sectors. Such investments may therefore drop sharply in value in response to market, regulatory or research setbacks in addition to possible adverse effects from the competition of new market entrants, patent considerations and product obsolescence. Particularly within technology, short product cycles and diminishing profit margins are additional factors to consider when investing.
