FUND MANAGER'S COMMENTS

The Fund delivered 0.23% in August 2026 which a line with the benchmark, and delivered 3.00% in the 12-months period ending 31 August 2026, outperforming the benchmark by 21bps.

Malaysia's 2Q2026 GDP grew by 6% YoY (1Q2026: 5.4% YoY), surpassing expectations amid resilient private consumption (+4.8%), continued expansion in gross fixed capital formation (+4.6%), particularly in structures and machinery & equipment, and a sharp acceleration in exports (+17%). The strong growth underscores the resilience of domestic economic activity despite risks arising from geopolitical uncertainties. On the supply side, stronger growth was mainly supported by continued expansion in the services and manufacturing sectors, alongside a strong rebound in mining & quarrying activity.

Inflation remained contained despite elevated cost pressures, as headline inflation edged down to 1.8% YoY in July 2026 from 1.9% YoY in June, largely reflecting softer transport inflation. Core inflation also eased to 1.8% YoY in July 2026 from 1.9% YoY in June, resulting in 7M2026 average headline and core inflation of 1.8% and 2.0% respectively.

Malaysia's trade performance remained strong in July 2026, with total trade surging 37.3% YoY to a record RM364.7 billion, driven by broad-based export growth across manufacturing, agriculture and mining products. Exports rose 38% YoY, underpinned by robust demand for semiconductors and other E&E products, alongside strong growth in machinery & equipment, petroleum products and optical & scientific equipment. External demand was strong from ASEAN, China and Taiwan, while imports increased 36.4% on higher purchases of intermediate and capital goods. Consequently, trade surplus widened to RM22.5bil.

We limit our investment exposure to short-term deposit placements due to the very low risk nature of the Fund.

RISKS	
Returns not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the target fund's investment objective will be achieved.
General market environment risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the target fund's NAV.
Inflation risk	This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments.
Manager's risk	This risk refers to the day-to-day management of the target fund by Principal which will impact the performance of the target fund, e.g. investment decisions undertaken by Principal as a result of an incorrect view of the market may adversely affect the performance of the target fund.
Reclassification of Shariah non-compliant status risk	This risk refers to the risk that the currently held Shariah-compliant securities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia (SACSC), the Shariah adviser, the Shariah boards of the relevant Islamic indices or the Shariah adviser of the issuer.
Credit and default risk	Investment of the target fund may involve a certain degree of credit and default risk. Generally, credit and default risk is the risk of loss due to the counterparty's and/or issuer's non-payment or untimely payment of the investment amount as well as the returns on investment. Principal aim to mitigate this risk by performing fundamental credit research and analysis to determine the creditworthiness of its counterparty and/or issuer. Investment in the target fund is not the same as placing funds in a Shariah-compliant deposit with a licensed Islamic financial institution. There are risks involved and investors should rely on their own evaluation to assess the merits and risks when investing in the target fund.
