FUND MANAGER'S COMMENTS

The Fund's performance for the month of May 2016 stayed flat. Nevertheless, the fund outperformed the benchmark by 0.34%.

In May 2016, the FTSE Bursa Malaysia Kuala Lumpur Composite Index fell 2.79% mom to 1,626.00 points, continuing its downtrend from the previous month. Year-to-date, the Index has fallen 3.93%. Key events during the month include: 1) The 1MDB bond default saga; 2) Fears of liquidity stress in Malaysian banking system as money supply slowed; 3) Sarawak elections which Barisan Nasional won, as expected; 4) MSCI rebalancing which subjected the Malaysian market to repositioning and short-selling activities, resulting in net foreign equity outflows of RM4.3bn in May; 5) Rising probability of US rate hike in the coming months; 6) Weaker than expected China PMI; 7) Oil trading above USD50/barrel; and 8) Weaker MYR despite the stronger oil price.

Given the brutal 1Q16 earnings season where consensus earnings disappointed by an average of 25% and a more subdued growth expectations in Malaysia, we continue to remain defensive and anticipate a range bound equity market. Stock picking remains the key to alpha generation and we remain selective; we continue to like high dividend yielders such as Real Estate Investment Trusts (REITs), conglomerates and utilities. We also continue to maintain our overweight in the construction sector as positive newsflow from more fiscal expansion from the government will continue this year. For fixed income, the local market continued to see upward movement in bond yields during the month of May amid lingering concerns of a possible U.S Fed rate hike in June coupled with/resulting in a weakening of the Ringgit. Currently, investors are taking a risk off approach. The FOMC meeting on the 14-15th of June and the upcoming Brexit referendum on the 23rd of June will be closely watched. We believe the market will continue to reposition and shift focus to credit market in lieu of the better yield pick-up. We will focus on both corporate bond primary and repriced secondary issuances.
