## FUND MANAGER’S COMMENTS

The Fund remained at 0.00% in May 2019, underperforming the benchmark by 0.45%. Year-to-date (YTD), the fund has underperformed the Benchmark by 1.13%.

During the month, Malaysia Government Investment Issue (“MGII”) curve moved lower between 1bps to 13bps across all tenures in the month of May. Overall, better buying was seen following the OPR cut by BNM on 7 May as well as BNM’s announcement to enhance onshore FX and bond market with new initiatives. The MGII yields for the 3-, 5-, 10-, 15-, 20- and 30-year closed at 3.46% (-1bps), 3.58% (-4bps), 3.83% (-4bps), 4.07% (-10bps), 4.31% (-3bps) and 4.55% (-12bps) at the end of May 2019.

On Sukuk strategy, we continue to expect 3.00% OPR to stay for the rest of 2019. While market is half way pricing in another 25bps of rate cut (at the point of writing) certain part of the government curve, we need to see weaker domestic data to support that argument. Regardless of the OPR outcome, the Fund will still stay overweight duration against benchmark as we view the overall international and domestic monetary policies to remain expansionary. The flattish long-end government yield curve will likely stay for the remaining of 2019. Fund will also overweight credit against government bond for better yield pick-up. We remain NEUTRAL on equities given lack of earnings growth (consensus pencilled in negative earnings growth for 2019) which is balanced by undemanding valuation now. Having said that, we are of the opinion that value is emerging in Malaysian equities having shed 2.7% YTD and Malaysia tend to be more defensive when volatility in global equity markets rises. While we will continue with the high equity weighting with low beta investment strategy, we will continuously accumulate some alphas for the portfolios. We look to add selected blue chips in the banking, telecommunication and glove sectors. At the same time, we are reducing exposure on some of the Technology-related names on the back of rising trade conflicts.
