#### FUND MANAGER'S COMMENTS

During the month, the Fund declined by -3.45%, outperforming the Benchmark by 127 basis points (bps). Year-to-date, the Fund declined -0.97%, outperforming the Benchmark by 157 basis points. China and Singapore contributed positively while Malaysia was a drag. In sector terms, Industrials contributed the most to the performance.

Asia-ex-Japan equities went into a risk-off mode and corrected -3.9% (US\$) in February triggered by a surge in US 10-year yields and concerns of higher inflation. The sell-off was broad-based with exception for healthcare. We remain positive on Asian equities as upside should be guided by earnings growth of 13% in 2018 but volatility could be higher given trade tensions, rising bond yields and credit spreads and diminishing bond purchases. Investor sentiment on the 'Goldilocks' scenario will also be tested especially if US wage growth data shows a pick-up significantly beyond 3%. We prefer cyclical to defensives as Asia is just into the 2nd year of significant sales and earnings growth and China is still implementing supply side reform. Given relatively tighter liquidity versus 2017, we would be more cautious on countries with a weakening current account and fiscal deficit coupled with rising inflation like India and Philippines. The Fund is Overweight in China, Singapore and Australia and Underweight Taiwan and Korea. In sector terms, our Fund is Overweight Materials, Consumer Discretionary and Energy and Underweight Information Technology, Utilities and Telecommunications.
