FUND MANAGER'S COMMENTS

In August 2016, the Fund was up 0.73%, underperforming the benchmark by 1.59%. We are overweight in Hong Kong, Indonesia and Philippines, and underweight in China, Korea and Malaysia. Sector-wise, we are overweight in Telecommunications, Financials and Consumer Services and underweight in Oil & Gas, Technology, Industrials, Basic Materials and Utilities. Year-to-date, the Fund is up 0.01%, underperforming the benchmark by 4.02%.

The Shariah Asian equity universe rose 2.86% in August, with outstanding performances from China and Thailand. Equity markets in Asia continue to be supported by central bank easing. Real rates remain generally positive across the region, with inflation continuing to ease across most countries. Meantime, earnings revision seem to be stabilizing with some selective upgrades. Valuations are reasonable at 12X P/E.

We remain buyers of the markets, especially on dips, and intend to be fully invested. As we head into the second half of 2016, we see positive local factors favoring Asian markets balanced against risks from global macroeconomics. We intend to generate alpha via stock selection and investments into growth opportunities like e-commerce and electric vehicles.
