FUND MANAGER'S COMMENTS

For the month of July 2017, the Fund gained 0.31% outperforming the benchmark by 0.20%.

The FTSE Bursa Malaysia Kuala Lumpur Composite Index (FBMKLCI) was lackluster in July, falling 0.21% to close at 1,760 points. The key highlight during the month was the listing of Lotte Chemical Titan (Lotte), the largest initial public offering since 2012. The stock fell at debut due to weak investor demand and suffered another sharp drop after it announced a 72% decline in its second quarter net profit. Lotte closed the month at RM4.70 or 27% below its IPO price of RM6.50. Meanwhile, the key measures announced by the government at this year's Invest Malaysia were: 1) launch of the Leading Entrepreneur Accelerator Platform (LEAP) market; 2) plans to establish an integrity and governance unit at Government-linked Companies (GLCs); and 3) greater gender diversity and corporate governance in Corporate Malaysia.

The local market is in a consolidation stage with foreign inflows moderating as we enter seasonal holiday months in the western world. Investors are now awaiting fresh catalysts before market can resume its uptrend. Key catalysts include: 1) the East Coast Rail Link contracts being announced; 2) an upgrade in earnings estimates following second quarter earnings season; and 3) resumption of foreign flows into the equity market. Nevertheless, we are cautious in the short term in chasing beta stocks given that there may potentially be headwinds from the reduction of the US Federal Reserve balance sheet heading into September. We continue to like construction, tourism and e-commerce/logistics names. GLC restructuring and banks remain core holdings in our portfolios.

The MGS yields traded higher along the belly of the yield curve in July with yields wider by 1 to 6 bps for the 5-year to 15-year MGS. The mild correction continued into July as market players were cautious to the potential tightening of monetary policy by the developed markets. Meanwhile, inflation continued to decelerate to 3.6% y-o-y in June after peaking at 5.1% in March. Inflation is further expected to trend lower in the coming months following the drop in crude oil prices recently. During the month, the central bank kept its policy rate unchanged on 13 July and shows little inclination to adjust monetary policy despite the strong growth and higher inflation in 1Q 2017. Nevertheless, as headline inflation expected to moderate in 2H2017 despite robust domestic demand, BNM is expected to keep its OPR unchanged in 2017.

We continue to remain fully invested with focus on selective primary corporate bond issuance and exposure into the government securities when the opportunity arises.
