## FUND MANAGER'S COMMENTS

In April, the Fund recovered 0.59%, out-performing the benchmark by 0.47%. Year – to-date (“YTD”), the Fund has risen 0.82% while the benchmark was up 1.67%

Services and Manufacturing Indicators in the Eurozone continue to strengthen. But in the United States, while Services growth remains strong, Manufacturing has weakened. In Malaysia, at the recent high 1862.58 on the FTSE Bursa Malaysia Kuala Lumpur Composite Index (“FBMKLCI”), the market was trading at Price Earnings Ratio (“PER”) of 16.6 times and 15.2 times for 2015 and 2016 respectively. With Earnings Per Share (“EPS”) growth projected at 5.7% and 9.1% for both years respectively, the market looks overvalued based on the 5-year average PER of 14.7 times. Still, we have been able to find pockets of value as certain sectors continue to do well in this slow growth, low inflation environment.

In terms of strategy, we remain comfortable with the market and plan to stay highly invested. We will keep the portfolio conservative and focus on stock selections for out-performance. We are adding stocks which will benefit from the lower oil prices and weaker Ringgit. In terms of sectors, the Fund is overweight Transport, Manufacturing and food and beverage (“F&B”). For fixed income, we aim to be fully invested with concentration on selective corporate bonds from the primary and secondary market with higher yields for better yield enhancement.

### Disclaimer:

The benchmark performance is not a guide to future performances which may differ. The performance of the fund is not guaranteed. The value of the fund will fluctuate and may fall below the amount of premiums paid and the fund value depends on the actual performance on the underlying investment.

Any income distribution from the underlying assets of the investment-linked fund will be automatically reinvested into the respective investment-linked fund. The policy owner's total number of units will not change as a result of the reinvestment.
