FUND MANAGER'S COMMENTS

With the Fed now guiding 2 more rate hikes for US (bring total to 4 rate hikes for 2018) and Europe indicating its intention to stop asset purchase by end of year, we are currently seeing more tightening measures and reduced liquidity. However, there are increasing risks that global economy may slow down and higher likelihood that some of the tightening measures may not have much room to move further. China, for example, is already giving a different signal. The contrasting signals and escalating trade tensions has increased volatility and downside risk to the global economy. As such, we maintain our strategy of shortening our duration slightly to around 5 years and may also temporary hold slightly higher cash level to take opportunity of potential yields spikes. Rising yields may impact the portfolio returns in the short term, but in the longer term we see opportunities to buy good quality corporate sukuk at higher yields.
