FUND MANAGER'S COMMENTS

In July 2015, the Fund increased 0.68%, outperforming the benchmark by 20 basis points ("bps"). Year-to-date ("YTD"), the Fund fell 1.31% while the benchmark dropped 0.07%

With the Greece issue temporarily contained, focus is now trained on the China slowdown. Over in the US, the liftoff in 2015 should be very expected by now. On 28 July 2015, our Prime Minister announced a Cabinet reshuffle, which is seen as a decisive move to ensure a united Government as the 1MDB probe continues. The Malaysian Ringgit ("MYR") hit a high of 3.83 on 31 July 2015, amid a sharp drop in forex reserves to USD100.5bn in July 2015 from USD105.5bn in June 2015. We expect the MYR to remain under pressure. Net foreign selling rose to RM11.7bn as at end July 2015. As we remain cautious of the political scene, market continues to be very narrow and lacks any major positive catalyst at this point in time. Healthy earnings growth is an essential ingredient for the market to move up from here, as multiple expansions is becoming less of a driver. Earnings per Share ("EPS") growth is at 7.0%-9.2% with corresponding Price Earnings Ratio ("PER") of 16.1 times-14.8 times for 2015 and 2016 respectively. With the 5-year average PER of 14.7 times, the market continues to look fair.

On the equity strategy, we keep the portfolio conservative, focusing on stock selections for out-performance. We continue to find defensive growth in Exporters (Technology, Gloves, and Furniture), Ports and Utilities. We remain underweighted in Oil & Gas, Plantations, and Telcos. For fixed income, we aim to be fully invested with concentration on selective repriced corporate bonds from the primary and secondary market with higher yields for better yield enhancement.

Disclaimer:

The benchmark performance is not a guide to future performances which may differ. The performance of the fund is not guaranteed. The value of the fund will fluctuate and may fall below the amount of premiums paid and the fund value depends on the actual performance on the underlying investment.

Any income distribution from the underlying assets of the investment-linked fund will be automatically reinvested into the respective investment-linked fund. The policy owner's total number of units will not change as a result of the reinvestment.
