FUND'S MANAGER COMMENTS

For the month of June 2017, the Fund gained 0.28% outperforming the benchmark by 0.03%.

The Malaysia Government Securities ("MGS") yield curve in general moved higher across the curve. Market was relatively quiet with thin liquidity throughout the whole month due to the festive season. There was a mild sell-off which largely occurred towards the last trading day of the month. Some of the sell-off was due to portfolio rebalancing as there were some changes to the index. Meanwhile, foreign sentiment continues to improve in May. The Malaysian inflation continued to decelerate for its second month to 3.9% y-o-y in May after peaking at 5.1% in March, lending credence to BNM's view that the current inflationary pressure is temporary. Inflation is further expected to trend lower in the coming months following the drop in crude oil prices recently. With decent GDP growth we expect the central bank to keep the current policy rate unchanged throughout the year.

We continue to remain fully invested with focus on primary corporate bond issuance and exposure into the government securities when the opportunity arises.
