FUND MANAGER'S COMMENTS

We recommend that you read and understand the contents of the Principal Islamic Global Multi-Asset Fund Prospectus Issue No. 1 dated 03 August 2023 which has been duly registered with the Securities Commission Malaysia, before investing and that you keep the said Fund Prospectus for your record. Any issue of units to which the Fund Prospectus relates will only be made upon receipt of the completed application form referred to in and accompanying the Fund Prospectus subject to the terms and conditions therein. Investments in the Fund are exposed to settlement risk, currency risk, valuation risk, interest rate risk, credit risk, equity risk and market risk. You can obtain a copy of the Fund Prospectus from the head office of Principal Asset Management Berhad or from any of our approved distributors. Product Highlight Sheet ("PHS") is available and that investors have the right to request for a PHS; and the PHS and any other product disclosure document should be read and understood before making any investment decision. There are fees and charges involved in investing in the funds. We suggest that you consider these charges carefully prior to making an investment. Unit prices and income distributions, if any, may fall or rise. Past performance is not reflective of future performance and income distributions are not guaranteed. You are advised to read and understand the contents of the Unit Trust Loan Financing Risk Disclosure Statement before deciding to borrow to purchase units. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV; and where a unit split is declared, the value of your investment will remain unchanged after the distribution of the additional units.

RISKS

All investment carries some form of risks. The potential key risks include but are not limited to the following:

Returns not guaranteed	The investments of the target fund is subject to market fluctuation and its inherent risk. There is NO GUARANTEE on the investment which includes your investment capital and returns, nor any assurance that the target fund's objective will be achieved
Market risk	The risk refers to the possibility that an investment will lose value because of a general decline in financial markets due to economic, political and/ or other factors, which will result in a decline in the target funds' NAV.
Inflation risk	This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Currency risk	Currency risk is applicable to class(es) (e.g. Class MYR-Hedged) which is in a different currency than the base currency of the target fund (i.e. USD). The impact of the exchange rate movement between the base currency of the fund and the currency denomination of the respective classes may result in a depreciation of the value of your holdings as expressed in the base currency. As for the hedged class, the class itself provides mitigation to the currency risk arising from the difference between the currency denomination of the class and the base currency. While Principal aim's fully hedge the currency risk for a hedged class, you should note that it may not entirely eliminate currency risk. In addition, as a result of hedging, a hedged class will not be able to enjoy the full benefits of the currency movement in the event of a favourable movement of the currency denomination of the hedged class against the base currency of the fund. You should also note that hedging incurs costs, which will impact the NAV of a hedged class.
Manager's Risk	Since the target fund invests into an Islamic collective investment scheme (CIS) managed by another manager, the master fund's manager has absolute discretion over the master fund's investment technique and knowledge, operational controls and management. In the event of mismanagement of the master fund, the NAV of the target fund, which invests into the master fund would be affected negatively.
Country risk	As the target fund invests in the master fund which is domiciled in Ireland, the target fund's investment in the master fund may be affected by risks specific to Ireland. Such risk include adverse changes in Ireland's economic fundamentals, social and political stability, laws and regulations and foreign investments policies. These factors may have an adverse impact on the price of the master fund and consequently target fund.
