CEO & President's Message

Dear Valued Client,

Sun Life Malaysia Assurance (SLMA) is pleased to report the Assurance Investment-Linked Fund Performance Report for 2022.

2022 was a year fraught with many unforeseen challenges and unexpected market volatilities. Despite market reopening and the expected return to normalcy, the global economy and global markets were impacted by the Russian-Ukraine conflict, new COVID variant, supply chain disruption pushing inflation to record levels resulting in the U.S Federal Reserve's decision to raise interest rates to battle high inflation.

Despite the uncertainties, I am proud to report that we have worked hard to stay ahead of the challenges while ensuring the company continues to build resilient growth and drive its investment commitments for the year. This exceptional performance is a testament to the execution of our strong business strategies, robust risk management approach, and unwavering focus on accelerating our digital transformation and sustainability plan.

Market Overview

The year 2022 was yet another eventful year. We started the year with the hope that markets would return to normalcy supported by a recovering economy, manageable inflation and low unemployment rate as the country shifted towards the COVID-19 endemic phase. However, that was not the case as global markets were rattled right from the start after the Federal Reserve signaled that they would hike rates, ending the low interest rate cycle that markets have been enjoying for more than a decade.

To amplify matters, global inflation surged at a rapid pace exacerbated by the Russia-Ukraine conflict that disrupted trade of key commodities, resulting in the Federal Reserve taking an aggressive stance to rein in inflation. At the end of 2022, the Federal Reserve hiked rates aggressively, bringing the federal fund rates from 0.25% to 4.50%. In line with rising global inflation, Bank Negara Malaysia (BNM) also hiked rates but at a more gradual manner with the Overnight Policy Rate ending the year at 2.75% from 1.75% as the central bank had to strike a balance between supporting economic growth recovery and managing inflation. Despite the rate hikes, Malaysia still managed to record strong GDP growth of 8.7% following the full reopening of the economy while coming off a low base.

CEO & President's Message

(Continued)

Volatility was the constant theme throughout the year as both global fixed income and equity markets were badly impacted as liquidity dried up while recession concerns saw record outflows from emerging markets. Some of our funds managed to outperform their respective benchmarks, while others were impacted. With the aggressive rate hikes, recessionary fears gripped markets as growth stocks bore the full brunt of markets as the rotation towards value stocks took place.

Bucking the trend was our domestic fixed income funds that managed to eke out some gains against a sea of red. Ringgit fixed income exhibited its resilience with the local sovereign yield curve rising at a milder pace, compared to the U.S Treasury yield curve which rose fast and steep. The steady earnings from the fixed income coupon were able to offset the market losses from the higher yields, contributing to the positive performance.

Market Review and 2023 Outlook

The markets entered 2022 with hopes of a continued global economic recovery as the world emerged from the COVID-19 pandemic following successful vaccination efforts. However, financial markets were thrown into turmoil by the unexpected Russia-Ukraine war which started early 2022. Both countries are major producers of key commodities, which drove inflation higher and caused further pressure on supply chains. At the peak, U.S inflation was 9.1% end June 2022, although it has tapered to 6.5% at year end, inflation remains a key concern compared to the Federal Reserve's 2% inflation target.

Through 2022, the U.S central bank was forced to respond aggressively by raising the lower and upper range of Federal Funds Rate from 0% - 0.25% to 4.25% - 4.50% by year end.

As a result, both bond and equity markets saw huge volatility which significantly impacted returns. The generic U.S 10-year Treasury yield ended the year at 3.9%, up by c.237bps year-on-year. Locally, Bank Negara Malaysia (BNM) also hiked rates, albeit by a milder 100bps, bringing policy rate to 2.75%. In line with the turmoil in global fixed income markets, the domestic fixed income market was also impacted. Local sovereign yields rose across the curve while seeing foreign outflows of RM9.8billion for the whole year.

The global equities had a torrid time as markets swung back and forth with volatility hitting new highs, surpassing the previous high seen during the 2008-2009 global financial crisis. Initially, the markets were poised for strong recovery momentum in 2022 in anticipation of further global recovery, particularly among emerging economies catching up with the more advanced economies as vaccination rates increased and borders were reopened, instead it turned out being a year of fending off growing recession concerns, supply chain disruptions and rising global rates to curb inflation pressure.

The expectation of the world to return to normal, possibly even surpassing pre-COVID levels by the end of 2022. Following the reopening of most developed economies, was rattled after the Federal Reserve signaled that they would begin raising interest rates aggressively from mid-March, largely exacerbated by uncertainty over Russia-Ukraine tensions that led to sanctions being imposed on Russia.

The old adage "when it rains it pours" held true as the rapidly spreading Omicron variant in China threatened supply chains once again with renewed restrictions and lockdowns pushing the world's economy towards stagflation - a combination of slowing growth and accelerating inflation. Additionally, the sanctions did not deter Russia as they went ahead and launched its

Market Review and 2023 Outlook

(Continued)

attack on Ukraine resulting in commodity prices shooting through the roof impacting supply chain and increasing the cost of doing business given the demand surge following the reopening of most economies. Even, the International Monetary Fund (IMF) revised the 2022 global growth forecast from 4.4% to 3.2% in 2022 after several negative revisions following the cost-of-living crisis, tightening financial conditions, Ukraine war and lingering COVID-19 pandemic taking its toll on the global recovery.

Though there was a slight relief rally towards the end of the year as the Federal Reserve signaled a slower rate hike pace as inflation appeared to be tapering, but some economists still predicted a rate cut as early as the end of 2023 due to recessionary fears. Markets felt even more relief after China lifted COVID restrictions earlier than expected and reopened its economy after maintaining its zero COVID policy following the opening of the world economies. Investors welcomed this development as the MSCI world Index clawed back some losses to end 2022 down -19.5% from the lows of -26.7%.

The domestic equity market was largely in-line with global markets and was tracking global markets closely but with an additional twist, the domestic political overhang that has been plaguing Malaysia since 2020. After numerous changes in governments, investor confidence and sentiment were badly affected due to the

uncertainty resulting in investors reducing their exposure in Malaysia.

The political impasse and subsequent resolution through the formation of the "New government" following GE15 was a positive surprise for markets and much welcomed as a mini rally ensued with the benchmark FBMKLCI raking up gains of 2.9% in the span of 2 weeks. Despite the boost, reality sank in after a couple of weeks as weak global economic sentiment and inflationary concerns weighed in with the FBMKLCI ended the year down -4.6% or -72 points to close at 1,495 points. After four consecutive years of foreign outflows, foreign investors finally turned net buyers' in 2022 to the tune of RM4.4 billion vs a net sell of RM3.2 billion in 2021.

Heading into 2023, the world economy is anticipated to be in better shape as a result of China's unexpected reopening, which helped boost projections for global growth up 0.2% to 2.9% from the initial forecast of 2.7% based on the IMF's January 2023 report.

However, growth is forecasted to be slower due to rising interest rates, recession concerns, and the war in Ukraine. Inflation is expected to decrease in some regions, leading to a slower pace of rate hikes and policy rates to peak in the first half of 2023 as central banks strike a balance between supporting growth and curbing elevated inflation.

Market Review and 2023 Outlook

(Continued)

Closer to home, Malaysia's economy is predicted to expand by 4.0% to 5.0%, with high inflation being stifled by price controls and subsidies. The absence of a one-time tax may improve earnings for large-cap companies, making valuations more attractive. The domestic fixed income market is neutral, while the equities market is cautiously optimistic.

from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial information.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- (a) Identify and assess the risks of material misstatement of the financial information, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Independent Auditors' Report to the Unitholders of Investment-Linked Funds of Sun Life Malaysia Assurance Bhd

(Continued)

- (b) Obtain an understanding of internal control relevant to audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- (c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors of the Manager.
- (d) Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial information or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Funds to cease to continue as a going concern.

We communicate with the Directors of the Manager regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other Matters

This report is made solely to the unitholders of the Funds, as a body, and for no other purpose. We do not assume responsibility to any other person for the content of this report.

Ketua Pegawai Eksekutif & Presiden
Sun Life Malaysia Assurance Berhad

Perutusan Ketua Pegawai Eksekutif & Presiden

Pelanggan Yang Dihargai,

Sun Life Malaysia Assurance (SLMA) berbesar hati untuk membentangkan Laporan Prestasi Dana Berkaitan-Pelaburan Insurans bagi tahun 2022.

2022 merupakan tahun yang dipenuhi pelbagai cabaran yang tidak dijangka dan pergolakan pasaran yang tidak diramal. Walaupun pasaran dibuka semula dan dijangka kembali normal, ekonomi global dan pasaran global yang telah dijejaskan oleh konflik Rusia-Ukraine, varian baharu COVID, gangguan rantaian bekalan telah menolak inflasi untuk mencecah paras tertinggi, sekaligus menyebabkan Federal Reserve A.S. mengambil keputusan untuk menaikkan kadar faedah bagi menangani inflasi.

Walaupun dibebani ketidakpastian, saya berbesar hati melaporkan bahawa kami telah berusaha gigih untuk menangani dan mengatasi cabaran sambil memastikan kami terus membina pertumbuhan yang berdaya tahan dan memacu komitmen pelaburan bagi tahun ini. Prestasi cemerlang yang dicatatkan menjadi bukti pelaksanaan strategi perniagaan kami yang kukuh, pendekatan pengurusan risiko yang cergas, dan tumpuan tidak berbelah-bagi untuk mempercepatkan pelan transformasi digital dan kelestarian kami.

Ulasan Pasaran Dan Unjuran 2023

Tahun 2022 ternyata merupakan satu lagi tahun penuh dengan rentetan peristiwa menarik. Kami memulakan tahun dengan harapan pasaran akan kembali normal disokong oleh ekonomi yang semakin pulih, inflasi yang terurus dan kadar pengangguran yang rendah apabila negara beralih ke fasa endemik COVID-19. Bagaimanapun, ia tidak menjadi kenyataan apabila pasaran global bergolak selepas Federal Reserve memberi isyarat bahawa mereka akan menaikkan kadar, justeru menamatkan kitaran kadar faedah rendah yang telah dinikmati oleh pasaran selama lebih sedekad.

Keadaan menjadi makin terjejas apabila inflasi global yang turut meningkat pada kadar yang pantas menjelaskan lagi keadaan, diburukkan akibat konflik Rusia-Ukraine yang mengganggu dagangan komoditi utama, menyebabkan Federal Reserve mengambil langkah agresif untuk mengekang inflasi. Menjelang akhir 2022, Federal Reserve menaikkan kadar secara agresif, membawa kadar dana persekutuan dari 0.25% kepada 4.50%. Seiring dengan peningkatan inflasi global, Bank Negara Malaysia (BNM) juga turut menaikkan kadar tetapi secara lebih beransur-ansur dengan Kadar Dasar Semalam mengakhiri tahun pada 2.75% berbanding 1.75% apabila bank pusat terpaksa mencari keseimbangan di

Perutusan Ketua Pegawai Eksekutif & Presiden (Sambungan)

antara menyokong pemulihan pertumbuhan ekonomi dan menangani inflasi.

Sungguhpun berdepan kenaikan kadar inflasi, Malaysia masih berjaya mencatatkan pertumbuhan KDNK yang kukuh pada 8.7% berikutan pembukaan semula sepenuhnya ekonomi dan bangkit daripada asas yang rendah.

Pergolakan masih menjadi tema berterusan sepanjang tahun apabila kedua-dua pasaran pendapatan tetap dan ekuiti global terjejas teruk akibat kekurangan kecairan manakala kebimbangan mengenai kemelesetan pula menyaksikan aliran keluar tertinggi dari pasaran baharu muncul. Beberapa dana kita berjaya mengatasi penanda aras masing-masing, manakala sebahagian lain telah terjejas. Dengan kenaikan kadar yang agresif, kebimbangan akan berlaku kemelesetan mencengkam pasaran dan menyaksikan saham pertumbuhan menerima tempias besar daripada pasaran apabila peralihan ke arah saham nilai berlaku.

Dana-dana pendapatan tetap domestik kami berjaya menentang trend berlatarkan kerugian dan meraih keuntungan walaupun berlatarkan kerugian. Pendapatan tetap Ringgit menonjolkan daya tahan mengagumkan di mana lengkuk pulangan kerajaan tempatan naik pada kadar sederhana, berbanding lengkuk pulangan Federal Reserve A.S yang meningkat dengan pantas dan curam. Perolehan stabil daripada kupon pendapatan tetap berjaya

mengimbangi kerugian pasaran daripada pulangan lebih tinggi, sekaligus menyumbang kepada prestasi positif.

Ulasan Operasi

Pada 2022, kami terus mengukuhkan ketahanan perniagaan kami dan menggandakan kemampuan digital kami untuk memberikan impak positif kepada Pelanggan kami.

Berikut adalah beberapa sorotan penting keutamaan kami pada 2022:

Kami juga melancarkan 'Client Ambassador Team' (CAT) yang berperanan sebagai duta jenama untuk berhubung rapat dengan Pelanggan.

Ulasan Pasaran dan Unjuran 2023

Pasaran memasuki 2022 dengan harapan ekonomi global akan pulih apabila dunia kembali bangkit daripada pandemik COVID-19 selepas usaha vaksinasi berjaya dijalankan. Namun begitu, pasaran kewangan mengalami pergolakan akibat perang Rusia-Ukraine yang tidak dijangka yang berlaku pada awal 2022.

Memandangkan kedua-dua negara adalah pengeluar utama beberapa komoditi penting harga, ia telah menolak naik inflasi menjadi lebih tinggi dan memberikan tekanan berterusan ke atas rantaian bekalan. Kemuncaknya, inflasi Amerika Syarikat (A.S) mencecah 9.1% pada akhir Jun 2022, walaupun ia kembali susut kepada 6.5% pada akhir tahun, inflasi masih menjadi kebimbangan utama berbanding sasaran inflasi 2% oleh *Federal Reserve*.

Sepanjang 2022, bank pusat A.S terpaksa bertindak agresif dengan naikkan julat rendah dan tinggi *Federal Funds Rate* dari 0% - 0.25% kepada 4.25% - 4.50% pada akhir tahun.

Akibatnya, kedua-dua pasaran bon dan ekuiti menyaksikan pergolakan besar yang memberi kesan ketara ke atas pulangan. Pulangan Perbendaharaan 10-tahun A.S biasa mengakhiri tahun pada 3.9%, naik c.237bps tahun-ke-tahun. Dalam negara pula, Bank Negara Malaysia (BNM) turut menaikkan kadar, walaupun agak ringan sebanyak 100bps, menjadikan kadar polisi pada 2.75%. Sejajar dengan pergolakan di pasaran pendapatan tetap global, pasaran

pendapatan tetap tempatan juga turut terjejas. Pulangan kerajaan tempatan naik sebanyak 30bps kepada 76bps manakala pasaran pendapatan tetap tempatan turut menyaksikan aliran keluar asing sebanyak RM9.8 billion untuk sepanjang tahun.

Ekuiti global melalui tempoh yang sukar apabila pasaran tidak menentu sehingga mencecah paras tertinggi, mengatasi paras tertinggi terdahulu yang berlaku semasa krisis kewangan global 2008 - 2009. Pada awalnya, pasaran bersedia untuk memulakan momentum pemulihan pada 2022 dengan jangkaan akan berlaku pemulihan global yang seterusnya, terutamanya di kalangan pasaran baru muncul yang sedang berusaha mengejar ekonomi lebih maju ketika kadar vaksinasi meningkat dan sempadan mula dibuka semula, sebaliknya ia menjadi tahun yang perlu menepis kebimbangan akan berlaku kemelesetan, gangguan rantaian bekalan dan kenaikan kadar global untuk mengekang tekanan inflasi.

Jangkaan adalah dunia akan kembali normal, malah mungkin mengatasi paras pra-COVID menjelang akhir 2022 berikutkan pembukaan semula kebanyakan ekonomi maju, menjadi goyah selepas *Federal Reserve* memberi petunjuk bahawa mereka akan mula menaikkan kadar faedah secara agresif pada pertengahan Mac, diburukkan lagi oleh ketidakpastian berhubung ketegangan di antara Rusia dan Ukraine yang membawa kepada sekatan dikenakan ke atas Rusia.

Ulasan Pasaran dan Unjuran 2023

(Sambungan)

Pepatah “jatuh ditimpa tangga” ada benarnya apabila penyebaran varian Omicron di China sekali lagi mengugat rantaian bekalan dengan halangan dan sekatan pergerakan kembali dikenakan, menolak ekonomi dunia ke arah stagflasi – gabungan keperlahaman pertumbuhan dan percepatan inflasi.

Sungguh begitu, sekatan yang dikenakan tidak menghalang Rusia apabila mereka meneruskan serangan ke atas Ukraine, menyebabkan harga komoditi melonjak tinggi dengan bekalan yang terjejas manakala kos menjalankan perniagaan berikutan permintaan yang meningkat apabila kebanyakan ekonomi dibuka semula. Saham global kekal berada di bawah tekanan apabila pelabur terus mengambil kira kenaikan kadar berikutnya manakala inflasi pula terus bergerak naik di kebanyakan ekonomi utama. Eropah terjejas teruk kerana perang di Ukraine telah menyebabkan berlakunya krisis tenaga yang mengancam untuk menolak blok ekonomi berkenaan ke arah kemelesetan lebih awal dari jangkaan. *International Monetary Fund* (IMF) turut menyemak semula ramalan pertumbuhan global dari 4.4% kepada 3.2% untuk 2022 selepas beberapa semakan negatif berikutan krisis kos kehidupan, pengetatan keadaan kewangan, perang Ukraine dan pandemik COVID-19 yang bersisa telah memberi kesan ke atas pemulihan global.

Walaupun terdapat sedikit kelegaan menjelang akhir tahun berikutan jangkaan

Federal Reserve akan menaikkan kadar dengan yang lebih perlahan apabila inflasi dilihat semakin berkurangan, masih ada pakar ekonomi yang menjangka akan berlaku pemotongan kadar seawal akhir 2023 akibat keimbangan berlakunya kemelesetan. Terdapat keleaan tambahan untuk pasaran selepas China melonggarkan sekatan COVID lebih awal dari jangkaan dan membuka semula ekonominya selepas mengekalkan dasar sifar COVID, selepas ekonomi dunia kembali dibuka. Pelabur mengalu-alukan perkembangan ini di mana Indeks Dunia MSCI kembali naik selepas mengalami kejatuhan untuk mengakhiri 2022 turun -19.5% berbanding -26.7% sebelumnya.

Pasaran ekuiti tempatan dilihat sejarah dengan pasaran global dan menuruti dengan rapat pergerakan pasaran global tetapi dengan sentuhan tambahan, keadaan politik tidak terurus dalam negara yang telah melanda Malaysia sejak 2020. Selepas berlaku pelbagai perubahan dalam kerajaan, keyakinan dan sentimen pelabur terjejas teruk disebabkan ketidaktentuan yang mengakibatkan pelabur mengurangkan pendedahan mereka di Malaysia.

Kebuntuan politik dan resolusi seterusnya melalui pembentukan “Kerajaan Baharu” berikutan PRU15 adalah satu kejutan positif untuk pasaran dan amat dialu-alukan apabila lonjakan mini berlaku dengan penanda aras FBMKLCI menokok 2.9% dalam tempoh 2 minggu. Di sebalik rangsangan, realiti mula dirasai selepas

Ulasan Pasaran dan Unjuran 2023

(Sambungan)

beberapa minggu apabila sentimen ekonomi global yang lemah dan kebimbangan inflasi semakin meruncing di mana FBMKLCI mengakhiri tahun pada paras 1,495 mata dengan susutan -4.6% atau -72 mata. Selepas mengalami aliran keluar asing selama empat tahun berturut-turut, pelabur asing akhirnya menjadi pembeli bersih pada 2022 dengan nilai RM4.4 bilion berbanding jualan bersih RM3.2 bilion pada 2021.

Melangkah ke 2023, ekonomi global dijangka berada dalam keadaan lebih baik selepas pembukaan semula mengejut China, yang dijangka akan meningkatkan unjuran pertumbuhan global, naik 0.2% kepada 2.9% berbanding ramalan awal 2.7% berdasarkan laporan IMF Januari 2023.

Namun begitu, pertumbuhan diunjurkan akan agak perlahan akibat kenaikan kadar faedah, kebimbangan berlaku kemelesetan, dan perang di Ukraine. Inflasi dijangka menurun di beberapa rantau, membawa kepada kenaikan kadar yang lebih perlahan dan untuk kadar dasar memuncak pada separuh pertama 2023 apabila bank pusat berusaha untuk mengimbangkan antara sokongan pertumbuhan dan menekan peningkatan inflasi.

Dalam negara pula, ekonomi Malaysia dijangka berkembang sebanyak 4.0% - 5.0% dengan inflasi tinggi dibendung oleh kawalan harga dan subsidi sedia ada. Ketiadaan cukai makmur yang dikenakan

sekali sahaja boleh membantu memperbaiki perolehan syarikat bermodal besar, justeru menjadikan penilaianya lebih menarik. Manakala kestabilan politik pula mungkin menyaksikan kepulangan pelaburan asing yang lebih besar. Pasaran pendapatan tetap tempatan diletakkan sebagai neutral, manakala pasaran ekuiti pula optimistik berwaspada.

Tanggungjawab juruaudit untuk mengaudit maklumat kewangan

Objektif kami adalah untuk mendapatkan jaminan sewajarnya sama ada maklumat kewangan secara keseluruhannya adalah bebas daripada kesilapan pernyataan material, sama ada disebabkan oleh penipuan atau kesilapan, dan untuk menerbitkan laporan juruaudit yang merangkumi pendapat kami. Walaupun audit yang dijalankan adalah selaras dengan standard pengauditan yang dibenarkan di Malaysia dan antarabangsa, tiada jaminan bahawa kaedah ini dapat mengesan kesilapan pernyataan yang material. Kesilapan pernyataan boleh timbul daripada penipuan atau kesilapan dan dianggap material jika, secara berasingan atau dalam agregat, ia boleh mempengaruhi keputusan ekonomi pengguna yang dibuat berdasarkan maklumat kewangan ini.

Standard pengauditan yang dibenarkan di Malaysia dan Antarabangsa juga mewajibkan kami untuk melaksanakan pertimbangan profesional dan mengekalkan keraguan profesional semasa proses audit dijalankan. Kami juga:

- a) Mengenalpasti dan menilai risiko kesilapan pernyataan material maklumat kewangan, sama ada disebabkan oleh penipuan atau kesilapan, membentuk dan melaksanakan prosedur pengauditan yang responsif kepada risiko tersebut, dan mendapatkan bukti audit yang mencukupi dan sewajarnya

untuk menyediakan asas kepada pendapat kami. Risiko tidak dapat mengesan pernyataan material yang disebabkan oleh penipuan adalah lebih tinggi daripada yang berpunca daripada kesilapan, memandangkan penipuan boleh merangkumi pakatan sulit, pemalsuan, peninggalan sengaja, gambaran yang salah, atau melangkaui kawalan dalaman.

- (b) Pemahaman mengenai kawalan dalaman adalah relevan untuk membina prosedur pengauditan yang bersesuaian, bukan bertujuan untuk menyatakan pendapat tentang keberkesanan kawalan dalaman Pengurus.
- (c) Menilai kesesuaian dasar perakaunan yang digunakan dan kewajaran anggaran perakaunan dan pendedahan berkaitan maklumat kewangan yang dibuat oleh Pengarah bagi pihak Pengurus.
- (d) Menyimpulkan mengenai keberkesanan penggunaan usaha berterusan perakaunan yang dilaksanakan oleh Pengarah bagi pihak Pengurus dan, berdasarkan bukti audit yang diperolehi, tiada ketidakpastian material yang boleh menimbulkan keraguan munasabah mengenai keupayaan Dana-Dana untuk terus beroperasi. Jika terdapat ketidakpastian material, kami dikehendaki untuk menyatakan pendapat dalam laporan juruaudit yang berkenaan dan sekiranya pendedahan

tersebut tidak mencukupi, ia tidak akan mengubah pendapat kami. Kesimpulan kami berdasarkan bukti audit yang diperolehi sehingga tarikh laporan juruaudit. Bagaimanapun, kejadian yang tidak dijangka pada masa hadapan mungkin menyebabkan Dana-Dana tidak mampu lagi beroperasi sebagai usaha berterusan.

Kami berkomunikasi dengan Pengarah mengenai, skop dan jadual kerja audit yang dirancang juga sebarang penemuan isu berkaitan audit, termasuk sebarang kelemahan dalam kawalan dalaman yang telah kami kenalpasti sepanjang audit kami.

Lain-lain Perkara
