Risks	
All investment carries some form of risks. The potential key risks include but are not limited to the following:	
Returns not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is <b>NO GUARANTEE</b> on the investment returns, nor any assurance that the target fund's investment objective will be achieved.
Market risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets due to economic, political and/or other factors, which will result in a decline in the target fund's NAV.
Inflation risk	This is the risk of your investment in the target fund not growing or generating income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Manager risk	This risk refers to the day-to-day management of the target fund by Principal which will impact the performance of the target fund, e.g. an incorrect view by the manager of the market, non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weakness in operational process and systems, may adversely affect the performance of the target fund.
Shariah non-Compliance risk	This refers to the risk of the fund not conforming to Shariah Investment Guidelines due to investment in Shariah non-compliant instrument. In the event that Principal is required to rectify any Shariah non-compliance by disposing the related instrument, any losses from disposal due to investment in Shariah non-compliant instrument will be borne by Principal. In any circumstances, gain received from disposal shall be channelled to baitulmal and/or charitable bodies as approved by the Shariah Adviser.
Credit and default risk	Investment of the target fund may involve a certain degree of credit and default risk. Generally, credit and default risk is the risk of loss due to the counterparty's and/or issuer's non-payment or untimely payment of the investment amount as well as the returns on investment. Principal aim's to mitigate this risk by performing fundamental credit research and analysis to determine the creditworthiness of its counterparty and/or issuer.  Investment in the target fund is not the same as placing funds in an Islamic deposit with an Islamic financial institution. There are risks involved and investors should rely on their own evaluation to assess the merits and risks when investing in the target fund.
Other information	
Target market	Suitable for investors who: <ul style="list-style-type: none"> <li>• seek liquid and low risk investment with a short-term investment horizon;</li> <li>• want a Shariah-compliant investment;</li> <li>• seek for security and flexibility in investment; and/or</li> <li>• want to set money aside while waiting to make another investment.</li> </ul>
Pricing basis	Forward pricing, which means units are created and cancelled at the next valuation day upon the receipt of contribution and claims.  To recoup the cost of acquiring and disposing of assets, a dilution or transaction cost adjustment may be made to the NAV to recover any amount which the fund had already paid or reasonably expects to pay for the creation or cancellation of units.
Pricing frequency	Daily on Sun Life Malaysia business day.
Exceptional circumstances	Sun Life Malaysia may suspend the unit pricing and defer the payment of benefits, other than death and total and permanent disability benefits, subscription or redemption of units, switching of funds, under this contract for a reasonable period in exceptional circumstances, such as and including intervening events resulting in temporary closure of any stock exchange.
