FUND MANAGER'S COMMENTS

The Fund delivered 0.23% in April 2026 which was a line with the benchmark and delivered 3.03% in the 12-months period ending 30 April 2026, outperforming the benchmark by 18bps.

Malaysia's economy expanded 5.3% YoY in 1Q26, moderating from 6.3% in 4Q25, as activity slowed in some key sectors. Growth moderated across most sectors, including services (5.4% vs 6.3% in Q4), with performance anchored by the wholesale and retail trade sector. DOSM attributed this to sustained consumer spending, supported by a stable labour market, higher incomes, and ongoing household-focused initiatives. Output also rose at a softer pace in manufacturing (5.8% vs 6.1%), construction (7.8% vs 11.0%), and agriculture (2.8% vs 5.4%).

Headline inflation edged up to +1.7% YoY in March 2026 (February: +1.4%), while core inflation increased slightly to +2.1% YoY from +2.0%. The uptick was driven mainly by firmer prices in housing-related components, transport, insurance and personal services, while food inflation remained subdued, reflecting still-favorable supply conditions. Overall, inflation remains moderate and manageable, providing BNM with continued policy flexibility despite emerging cost pressures from external shocks.

Export growth moderated further to +8.3% YoY in March 2026 (February: +10.8% YoY), reflecting a broad-based slowdown. While manufacturing exports continued to drive growth, particularly electrical and electronics (E&E), momentum eased as external demand softened. Agricultural exports contracted more sharply, weighed down by weaker palm oil and rubber prices, while mining exports slipped amid lower LNG shipments.

Malaysia's labour market remained firm, with unemployment holding around 2.9%, as employment growth continued to outpace labour force expansion. Labour income and private consumption are expected to stay resilient in 2026, supported by civil service pay adjustments, steady private-sector wage growth, bonuses and ongoing cash assistance, although spillovers from global geopolitical developments remain a key downside risk to sentiment and hiring plans.

We limit our investment exposure to short-term deposit placements due to the very low risk nature of the Fund.

| RISKS | |
|--|--|
| Returns not guaranteed | The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the target fund's investment objective will be achieved. |
| General market environment risk | Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the target fund's NAV. |
| Inflation risk | This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased. |
| Financing risk | This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments. |
| Manager's risk | This risk refers to the day-to-day management of the target fund by Principal which will impact the performance of the target fund, e.g. investment decisions undertaken by Principal as a result of an incorrect view of the market may adversely affect the performance of the target fund. |
| Reclassification of Shariah non-compliant status risk | This risk refers to the risk that the currently held Shariah-compliant securities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia (SACSC), the Shariah adviser, the Shariah boards of the relevant Islamic indices or the Shariah adviser of the issuer. |
| Credit and default risk | <p>Investment of the target fund may involve a certain degree of credit and default risk. Generally, credit and default risk is the risk of loss due to the counterparty's and/or issuer's non-payment or untimely payment of the investment amount as well as the returns on investment. Principal aim to mitigate this risk by performing fundamental credit research and analysis to determine the creditworthiness of its counterparty and/or issuer.</p> <p>Investment in the target fund is not the same as placing funds in a Shariah-compliant deposit with a licensed Islamic financial institution. There are risks involved and investors should rely on their own evaluation to assess the merits and risks when investing in the target fund.</p> |
