FUND MANAGER'S COMMENTS

Equity

The portfolio modestly outperformed the index for the period, however delivered negative returns. Strong selection in utilities, health care and communication services were offset by selection in information technology. On a regional basis, strong stock selection in North America was partially offset by selection in Emerging Markets, Developed EU & Middle East ex UK and Japan. Within utilities and health care, our top relative contributors were overweight to ENN Energy and Haleon, respectively. Within information technology and industrials, our top relative detractors were overweight to MongoDB and Vertiv Holdings, respectively. Shares of ENN Energy Holdings, one of the largest clean energy distributors in China, rose after the company received a take-private offer from its largest shareholder, ENN Natural Gas, for approximately \$11.6 billion. The deal is part of ENN Natural Gas' reorganization ahead of its own proposed listing in Hong Kong. Shares of MongoDB fell over the period after issuing a weak guidance for fiscal 2026. Management stated it expects adjusted earnings per share of \$2.44 to \$2.62 and revenue of \$2.24 billion to \$2.28 billion, implying 12.7% revenue growth, which would be the slowest rate at least since the company went public in 2017.

Sukuk

The sukuk sleeve underperformed its benchmark by 3 basis points (bps), recording a positive return of 0.61% versus the benchmark's 0.64%. Government agencies contributed positively to the portfolio, while the utility sector was a detractor. KSA Sukuk Ltd was the main contributor, while TNB Global Venture was the main detractor. The fund's duration (2.94) is shorter than the benchmark (4.44).

RISKS

All investment carries some form of risks. The potential key risks include but are not limited to the following:

General market environment Risk

Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the target fund's NAV.

Inflation Risk

This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.

Manager's Risk

This risk refers to the day-to-day management of the target fund by UOBAM which will impact the performance of the target fund, e.g. investment decisions undertaken by UOBAM as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weakness in operational process and systems may adversely affect the performance of the target fund.

Reclassification of Shariah non-compliant status Risk

This risk refers to the risk that the currently held Shariah-compliant securities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia (SACSC), the Shariah adviser or the Shariah boards of the relevant Islamic indices. There may be opportunity loss to the target fund due to the target fund not being allowed to retain the excess gains derived from the disposal of the Shariah non-compliant securities. In the event the Shariah non-compliant securities are disposed at a price lower than the investment cost, it may adversely affect the value of the target fund. Thus, it may cause the NAV of the target fund to fall.

Credit and Default Risk

Credit risk relates to the creditworthiness of the issuers of Sukuk, Islamic money market instruments and/or financial institutions where the Islamic deposits are placed and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer of the Sukuk, Islamic money market instruments and /or financial institutions where the Islamic deposits are placed may impact the value as well as liquidity of the Sukuk, Islamic money market instruments and/or Islamic deposits. In the case of rated Sukuk, Islamic money market instruments and financial institutions, this may lead to a credit downgrade.

Default risk relates to the risk that an issuer of a Sukuk, Islamic money market instrument or a financial institution where the Islamic deposits are placed either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the Sukuk, Islamic money market instruments and Islamic deposits. This could adversely affect the NAV of the target fund.

RISKS (CONTINUED)

Interest Rate Risk	Interest rate risk refers to the impact of interest rate changes on the valuation of Sukuk and/or Islamic money market instruments. When interest rates rise, Sukuk and/or Islamic money market instruments prices generally decline and this may lower the market value of the target fund's investment in Sukuk and/or Islamic money market instruments. The reverse may apply when interest rates fall. Meanwhile, Sukuk and/or Islamic money market instruments with longer maturities and lower profit rates are more sensitive to interest rate changes.
Equity Risk	As the target fund will be investing in Shariah-compliant equities, the target fund will be affected by equity risk. Generally, equity risk may arise in the following forms, i.e., equity risks related to external factors and equity risks related to company-specific factors. All of these related equity risks can adversely affect the prices of equities, which would negatively impact the performance of the target fund.
Country Risk	The target fund is also subject to country risk. The value of the assets of the target fund may also be affected by the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the target fund may invest in. Further, when investing in foreign markets, there are countries which may require prior approvals before investments can take place.
