FUND MANAGER’S COMMENTS

The Fund delivered 0.26% in May 2025 which was outperforming the benchmark by 1bps, and delivered 3.20% in the 12-months period ending 30 May 2025, outperforming the benchmark by 12bps.

Monetary Policy Committee (MPC) of Bank Negara Malaysia decided to maintain the Overnight Policy Rate (OPR) at 3%. In its statement BNM stated that the latest indicators point towards continued global growth and trade, supported by domestic demand and front-loading activities. BNM added that global growth outlook would remain supported by positive labour market conditions, less restrictive monetary policy and fiscal stimulus. However, the tariff measures announced by the US and retaliations have weakened the outlook on global growth and trade. This outlook remains subject to considerable uncertainties, which include outcomes of trade negotiations and geopolitical tensions. Such uncertainties could also lead to greater volatility in the global financial markets.

Meanwhile, Bank Negara Malaysia also announced that the Statutory Reserve Requirement (SRR) Ratio will be lowered by 100 basis points, from 2% to 1%, effective 16 May 2025. The decision to reduce the SRR is part of Bank Negara Malaysia’s continuous efforts to ensure sufficient liquidity in the domestic financial system. This will facilitate banks to better manage liquidity in an environment of greater financial market volatility and provide continued support for financial intermediation activity. The SRR reduction will release approximately RM19 billion worth of liquidity into the banking system.

Malaysia’s economy grew 4.4% year-on-year in Q1 2025, confirming initial estimates and easing from a downwardly revised 4.9% growth in the previous quarter. This marks the slowest pace of expansion in a year, reflecting softer output growth in manufacturing (4.1% vs 4.2% in Q4), construction (14.2% vs 20.7%), and services (5.5% vs 5%).

Malaysia’s annual inflation rate held steady at 1.4% in April 2025, unchanged from March and matching market expectations. It remained the lowest level since February 2021, with food prices rising the least in six months (2.3% vs 2.5% in March).

We limit our investment exposure to short-term deposit placements due to the very low risk nature of the Fund.

RISKS

Returns not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the target fund's investment objective will be achieved.
General market environment risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the target fund's NAV.
Inflation risk	This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments.
Manager's risk	This risk refers to the day-to-day management of the target fund by Principal which will impact the performance of the target fund, e.g. investment decisions undertaken by Principal as a result of an incorrect view of the market may adversely affect the performance of the target fund.
Reclassification of Shariah non-compliant status risk	This risk refers to the risk that the currently held Shariah-compliant securities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia (SACSC), the Shariah adviser, the Shariah boards of the relevant Islamic indices or the Shariah adviser of the issuer.
Credit and default risk	<p>Investment of the target fund may involve a certain degree of credit and default risk. Generally, credit and default risk is the risk of loss due to the counterparty's and/or issuer's non-payment or untimely payment of the investment amount as well as the returns on investment. Principal aim to mitigate this risk by performing fundamental credit research and analysis to determine the creditworthiness of its counterparty and/or issuer.</p> <p>Investment in the target fund is not the same as placing funds in a Shariah-compliant deposit with a licensed Islamic financial institution. There are risks involved and investors should rely on their own evaluation to assess the merits and risks when investing in the target fund.</p>
